Ice Control Equipment Accessories

Pro-Lid

- Easy open/close, ergonomic design, allows user to remain on the ground while operating on most vehicles. (Excludes VBX3000)
- Weather seal protects de-icing material inside VBX Spreader.
- Optional on new spreader purchases and retrofits existing equipment. (Excludes VBX3000)

Pre-Wet System

- Available option on all new VBX and FORGE spreaders. (Excludes VBX3000)
- Equipped with 60-gallon tank.
- Reduces material usage and improves spreading efficiency.
- Activates de-icing material allowing the material to melt snow and ice at lower temperatures.
- Reduces material bounce for improved material placement.

Truck Equipment Accessories

D-Force

- Maintains consistent hydraulic down force to improve scraping performance.
- Optional on new truck plow purchases.
- Available for select straight-blade truck plow models (Excludes EXT, Heavy-Duty, and Trip-Edge plows.)

Back Drag Edge

- Improved scraping performance when back dragging.
- Complimentary product to optional D-Force.
- Available accessory on straight-blade plows. (Excludes 10' Heavy-Duty, Trip-Edge and EXT plows.)

Heavy Equipment

Tractor Mount Applications

- Straight-blade and v-plow options now available for select John Deere and Kubota tractors. (Excludes Heavy-Duty and 10' DXT.)
- Complete plow package includes blade crate, plow box, tractor undercarriage, and control kit.

12' Skid-Steer Box Plow

- New member of our SK Box Plow family.
- Self-adjusting hitch allows the blade to adjust to any terrain.
- Rugged support struts add structural strength, stability, and long-term reliability.
