For simple, water saving, weather-adjusting, automatic irrigation control, look to the Irritrol® Climate Logic® weather system. The three-component kit consists of a wireless weather sensor to transmit data from the outdoors, a receiver module to attach at the controller, and an SD card loaded with 40 years of historical weather information (specific to geographic location). The system gathers weather data and recalculates controller runtimes to compensate for changes. The Climate Logic weather system is compatible with the Rain Dial®-R, Total Control®-R, KwikDial® and MC-E blue (version 5.02 or later). These controllers (with Climate Logic) all earned the EPA WaterSense® label and qualify for all relevant rebates / benefits.
OPERATING SPECIFICATIONS

- Range: 1,000’ line of sight
- Compatible with:
  - Rain Dial-R series and earlier Rain Dial (Blue)
  - Total Control-R series
  - Kwik Dial Series (with adapter cable CMR-ADP)
  - MC-E (blue) version 5.02 or later
- One weather sensor can communicate with multiple receiver modules

OPTOMATIC ACCESSORIES

- Cable adapter CMR-ADP
- R-100-KIT
