Take Charge of Spring Lawn care – With Toro®

Looking for the latest products to help your readers tackle their lawn chores?
Here's a quick look at Toro's top new products for the season...

What Bumps?

New mower provides a customized ride for maximum comfort

Any homeowner with acreage to mow has probably felt the bumps and jolts on their existing riding mower. Toro solves that problem with the new **TimeCutter® HD Series**. These zero-turn mowers feature the ultra-cushioned MyRIDE® suspension system, which lets each rider select the perfect comfort setting for their preferences. The result? Homeowners can mow faster, get Toro's professional quality of cut, and do it all in exceptional comfort.

Tools On Board

Mowers with tool-mounting brackets save trips back to the shed

Now there's an option for acreage owners and landscape contractors who want to get more done with their zero-turn mower. Toro's new **TITAN® HD Series** -- with commercial-grade warranties -- has innovative tool-mounting brackets that make it easy to attach tools and accessories to the mower. Users can transport string trimmers, 5-gallon buckets, and other yard tools around the property, saving extra trips.

Small But Mighty

Toro's new lithium-ion battery-powered products pack surprising power

Just in time for spring yard work, Toro introduces the all-new **PowerPlex™ 40V Max**** family of handheld lithium-ion battery-powered products. Don't be fooled by the battery; these tools rival professional models with impressive power and run time. The new line includes a blower, a chainsaw, a hedge trimmer and two string trimmers, as well as a quick charger and two battery options.

Thick, Heavy Grass = No Problem

New engine delivers professional power for bigger mowing jobs

Tough mowing jobs demand extra muscle, and Toro's updated **TimeMaster® 30" mower** delivers with a new Briggs & Stratton Professional Series™ engine, their most powerful walk power mower engine. More power to the blade means the mower can handle thick, heavy grass with ease. The mower's 30" wide cutting path and travel speed capabilities can cut mowing time by as much as 40 percent.*

Stores Upright -- and Never Requires an Oil Change***

Mower is both easy to maintain and easy to store

Starting in early 2017, both Toro® Recycler® mowers with SMARTSTOW® will be equipped with a new Briggs & Stratton engine featuring Just Check & Add™ technology. The new engine allows the mower to be stored upright *and* never requires an oil change — homeowners can simply check and add oil when necessary. This marks the first time Briggs & Stratton has offered both technologies in one engine. Together, these features make the Recycler mower both easy to maintain and easy to store.

Find complete details about these and other Toro® products in the press releases within this folder.

*Compared to a 21" Toro® mower. Savings will vary due to mowing conditions.

**Battery manufacturer rating = 40V maximum & 36V typical usage. Actual voltage varies with load.

***Under normal use conditions. For complete details, refer to your Operating Manual or see <http://www.briggsandstratton.com/us/en/support/warranty> for details. Briggs & Stratton standard warranty terms and conditions apply. Just Check & Add does not extend the warranty period.
