AQUA-TRAXX®

SUPERIOR DRIP TAPE

AQUA-TRAXX®

The Standard in Drip Irrigation

Aqua-Traxx® drip tape can help you increase yield and water-use efficiency, and also improve crop quality by putting water and fertilizer right where you need them. Choose emitter spacing from 4 to 24 inches — with no cost increase — for precise placement and flexibility when designing your system. Find the perfect tape for your application with a wide variety of available flow rates, wall thicknesses and internal diameters, most requiring just 140-mesh filtration. The PBX Advantage increases durability, clog resistance and uniformity to set Aqua-Traxx apart from lesser drip tapes.

- Emitter spacing options for all soils
- Widest selection of flow rates
- Accurate delivery of water and fertilizer
- Superior clogging resistance

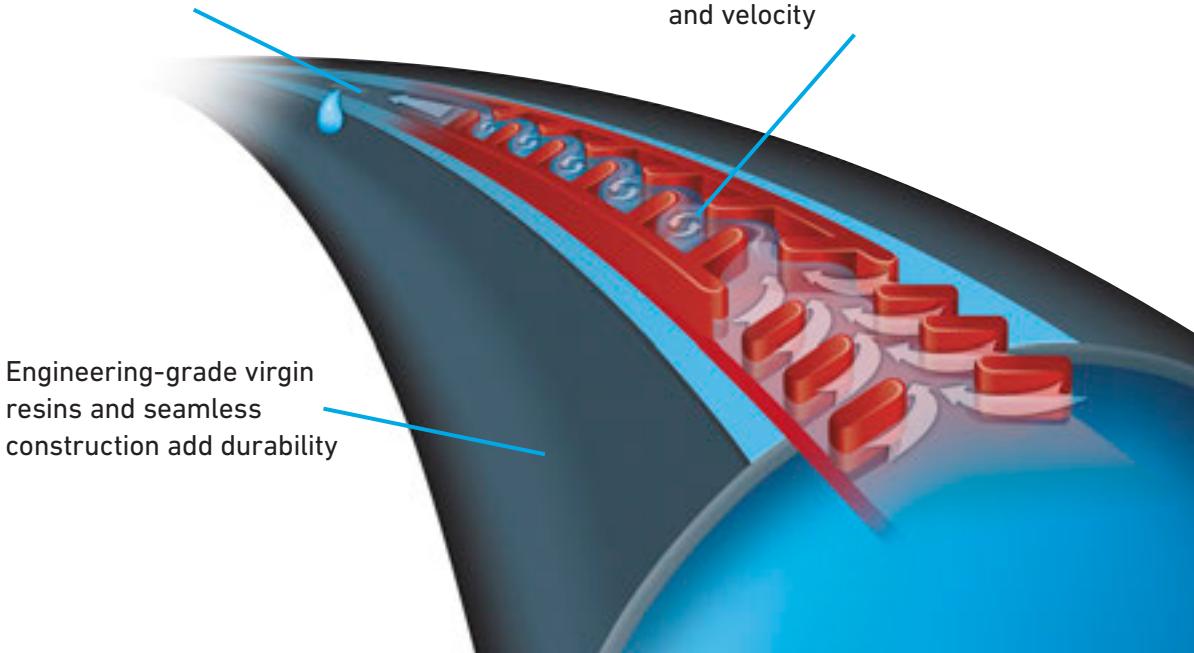

The PBX Advantage:

Aqua-Traxx® drip tape is designed and molded with a high level of precision, resulting in manufacturing consistency over 97 percent — the best in the industry. With Aqua-Traxx, you get greater reliability and more uniform output compared to lesser tapes: That's the PBX Advantage.

Precision-molded emitters resist clogging and promote uniform output

Proportionally Balanced Cross-Section (PBX) increases flow turbulence and velocity

Engineering-grade virgin resins and seamless construction add durability
