

**TORO**<sup>®</sup>

# SUPERIOR DRIP TAPE

**AQUA-TRAXX**<sup>®</sup>

**FLOWCONTROL**<sup>™</sup>

# THE EVOLUTION OF PRECISION

---

Market demands, weather patterns and resource availability change every day, so precision agriculture practices must evolve to stay ahead. From increasing yield and improving quality to making the best use of available resources. Irrigation technology is evolving, too — first flood, then pivot and now drip irrigation. Each step giving you more precise control over the time, energy and water you invest in your crop.

Toro drip tapes are innovative steps in the evolution of drip irrigation. Aqua-Traxx®, the original drip tape, provides unmatched clog resistance, durability and precision placement of your valuable water and fertilizer. New FlowControl™ drip tape — the only flow-regulating drip tape available — is Toro's latest advancement in the evolution of drip irrigation, giving you increased uniformity and control wherever you farm.

# AQUA-TRAXX®

## The Standard in Drip Irrigation

Aqua-Traxx® drip tape can help you increase yield and water-use efficiency, and also improve crop quality by putting water and fertilizer right where you need them. Choose emitter spacing from 4 to 24 inches — with no cost increase — for precise placement and flexibility when designing your system. Find the perfect tape for your application with a wide variety of available flow rates, wall thicknesses and internal diameters, most requiring just 140-mesh filtration. The PBX Advantage increases durability, clog resistance and uniformity to set Aqua-Traxx apart from ordinary drip tapes.

- Emitter spacing options for all soils
- Widest selection of flow rates
- Accurate delivery of water and fertilizer
- Superior clogging resistance

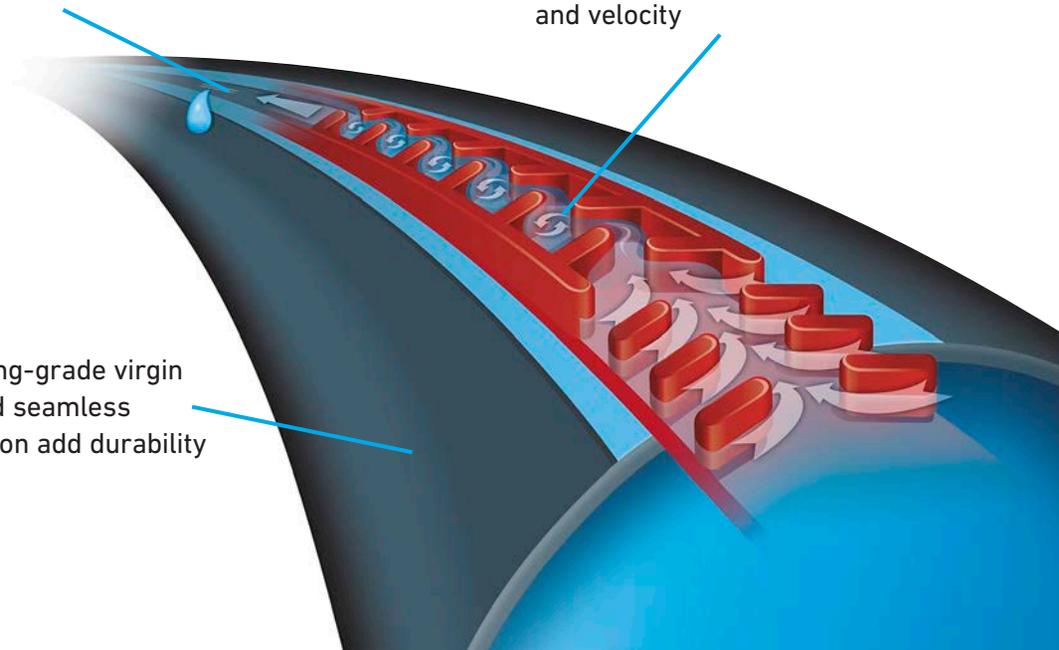

## The PBX Advantage:

Aqua-Traxx® and new FlowControl™ drip tapes are designed and molded with a high level of precision, resulting in manufacturing consistency over 97 percent — the best in the industry. With Toro Aqua-Traxx, you get greater reliability and more uniform output compared to ordinary tapes: That's the PBX Advantage.

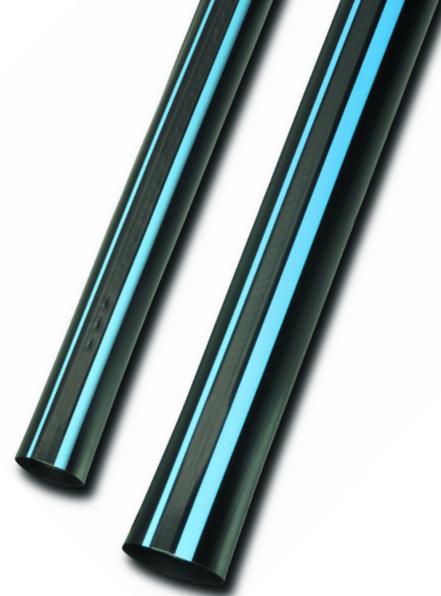

Precision-molded emitters resist clogging and promote uniform output

Proportionally Balanced Cross-Section (PBX) increases flow turbulence and velocity

Engineering-grade virgin resins and seamless construction add durability

# FLOWCONTROL™

## The Next Level of Uniformity, Efficiency and Yield

The new Toro FlowControl drip tape is the latest advancement in precision drip irrigation. It's the only flow-regulating drip tape available — giving you more control and uniformity wherever you farm. The innovative emitter design provides you with the flexibility to increase or decrease flow while maintaining a uniform output across changing elevations. Now you have more control over how much water your crops get, especially in long runs or hilly terrain, where water pressure can vary throughout the run.

ADVANTAGE

1

## MORE UNIFORM OUTPUT FOR ANY TERRAIN

### STANDARD TAPE

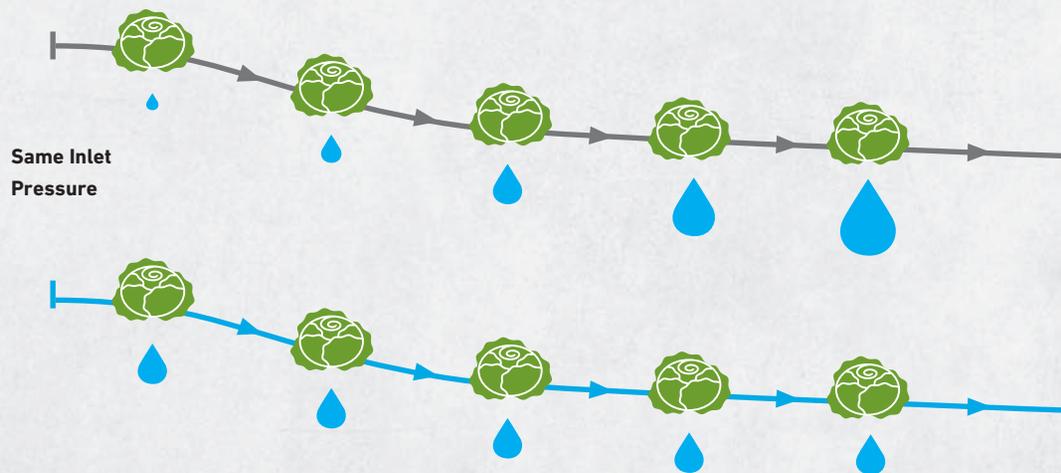

Standard tapes stress plants and reduce yield and efficiency by over- or under-watering as pressure changes throughout the run.

**RESULT:** Wasted water and fertilizer, stressed plants and reduced yields.

### FLOWCONTROL™

Toro FlowControl gives you uniform output regardless of elevation changes. So now you can adjust the amount of water you give your plants on hilly terrain, and they'll all receive the same amount through our uniform delivery system.

**RESULT:** More uniform plants and higher yields even in hilly terrain that might otherwise be impractical to farm.

## FEATURES:

- Designed and molded with the PBX Advantage for increased durability, clog resistance and uniform output
- Flexibility to increase and decrease flow without sacrificing uniformity
- Available in three diameters and five wall thicknesses, including more-affordable 5/8-inch 6 mil and 7/8-inch 8 mil
- Emitter spacing from 6–24 inches with no cost increase, for precise placement and flexibility when designing your system
- All flow rates require just 150-mesh filtration

ADVANTAGE

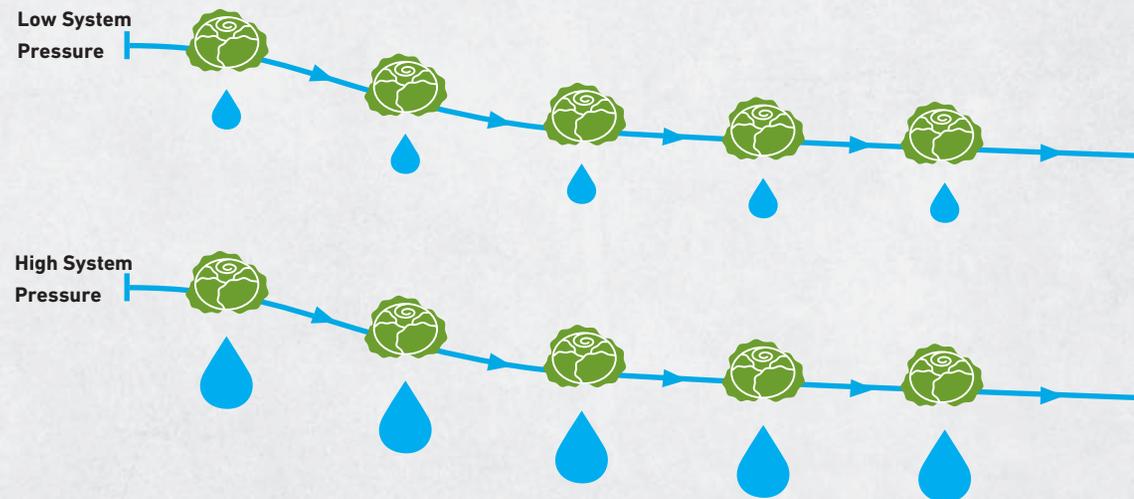

2

## THE ABILITY TO REGULATE THE FLOW

### FLOWCONTROL™

Toro FlowControl puts you in control of watering decisions. You control how much water your plants receive by increasing or decreasing the operating pressure — without sacrificing uniformity.

**RESULT:** More uniform delivery of water and fertilizer to the roots of your plants with the flexibility to control application rates.

### KEY

PART NUMBER: EA 5 05 04 67 - 1300

EA = Aqua-Traxx

EAFC = FlowControl

5 = Diameter (inch)

05 = Mil Thickness

04 = Emitter Spacing (inch)

67 = Flow Rate (gph/100)

1300 = Reel Length (feet/10)

\*X denotes the diameter. 5 for 5/8", 7 for 7/8", 8 for 1", 9 for 1 1/8" and 11 for 1 3/8"

\*\*\*xx denotes mil thickness.

\*\*\*1" only available in 13 mil; 1 1/8" only available in 15 mil; 1 3/8" only available in 15 mil.

Metric outlet spacing expressed in nominal length.

Coefficient of Variation (Cv) Less than 3%.
