

# Screen Champ Flyer

## Automatic Self-Cleaning Screen Filter

(YAF200 and YAF800 Models)

**Three Layer Floating Stainless-Steel Screen with greater effective screen area**

**Nozzle with V-shaped notch**

### Unique Features, Advantages, and Benefits:

- **Three (3) layered floating 316L Stainless Steel Screen**
  - Strong and durable. Will not crush under extreme conditions
  - Has greater effective screen area (open pore space)
  - Can push higher flow rates through the screen
- **Specially designed Nozzle with a “V Shaped Notch” provides superior cleaning of the screen**
  - Large Debris can sometimes be trapped on the inside of the fine screen
  - Other nozzles are not capable of sucking large debris during cleaning and can cause the nozzle to jam on the screen
  - The Yamit V-shaped nozzle easily ingests large debris and allows the dirt collector to rotate without jamming the screen.
  - Better cleaning, less down time, less maintenance
