Greensmaster® Walk Greens Mowers

Game changing Lithium-ion innovation.

Greensmaster® e1021 & eFlex™ 1021 – Lithium-Ion Power

Cutting Performance – Identical cutting performance, controls, and features of engine models. Additional diagnostic features including charge status indicator and machine settings.

Lithium-Ion Battery Technology – Proven Samsung® battery performance. Mow up to 35,000 sq.ft. (over 3000 sq. meters) on a single charge.

Extremely Quiet with Zero Engine Exhaust Emissions – Minimal noise and zero engine exhaust emissions to reduce your impact on the environment and your golfing community.

Onboard Backlapping – Backlapping without additional motors or bench tools required.

Greensmaster® 1000 Series & Greensmaster® Flex™ Series – Engine Power

Telescoping Handle – Accommodates operators of different heights, adjustable to 5 distinct positions.★

Handle Isolation Mounts – Helps eliminate variations in height-of-cut caused by walking strides.★

Intuitive, Precise, Easy-to-Access Controls – Simplifies operation and improves cutting performance & consistency.

Dual Function Bail – Combines safety and operational efficiency.★

High-Low Clip Rate Lever – Easily changes clip frequency in the field. Additional, multiple easy-to-configure clip settings allow superintendents to customize frequency of clip for any playing condition.

Durable Gear Drive Transmission – Provides best-in-class transmission life expectancy.

Proven – Now Detachable - DPA Cutting Units – Easily switch between an 8, 11 or 14-blade EdgeSeries™ Reel options. (14-blade option only for 1018/Flex 1018; 11 or 14-blade options for 1021 & Flex 1021; 8 or 11-blade options for 1026)★

Modular Sub-Assembly Design – Makes service and repairs simple and quick.

Swing-Axle Green to Tee Mower Conversion – Quickly convert from a Greens to a Tee mower.★

Backlapping Option – Onboard backlapping of each greensmower, no additional motors or bench tools required.*★

★ PATENT-PENDING  *Optional backlapping feature available on 1021, 1026 & Flex 1021 models only.

Greensmaster® TransPro 200

Compatibility – Current Fixed and Flex models compatibility, including most older model greensmowers.

Improved Mower Retention – Front roller pocket retainer with adjustable positions for securing mowers.

Improved Loading Angle & Hitch Design – Simplified operator loading/unloading for greater productivity.
Greensmaster® eTriFlex™ Series
All-Electric Traction, Steering, Lift & Reel Control – No onboard hydraulic fluid.

eTriFlex Models:
- Engine/Generator Model, 14 hp [10.4 kW] twin-cylinder Kawasaki® with Battery Assist Technology and up to 20% fuel savings. Constant 2,400 rpm and shrouded engine for amazingly quiet operation.
- Lithium-Ion Battery Model, 48-Volt Samsung® allows even quieter operation.

Advanced Cutting Performance
- Clip Rate – Maintains consistent cutting unit clip rate in turns on each individual reel.
- Wheel Speed Control – Individual wheel speed control during turns for reduced wheel scrubbing.
- Lift-In-Turn – Feature that provides a level cut from side to side, particularly in turns.
- Double A-Arm™ – plus Link-System Suspension for superior contour-following.
- Industry-Leading Flex™ Technology – and DPA cutting units for easy adjustment and precision.
- Lift-In-Turn Feature Combined with RDS – provide a consistent cleanup cut.
- Enhanced Clippings Capture System – for improved turf health.
- Lift & Reel Control – automatically produces an even cut line across all reels when raising or lowering cutting units.

Highly Productive and Versatile
- Ample Power – for a wide range of applications both on and off the greens.*
- Auto-Brake – engages on operator dismount.
- Foot-Operated Service and Parking Brake

Innovative Maintenance Enhancements
- InfoCenter™ – with protected settings, controls and advanced diagnostics.
- Tool-Free, Quick-Change cutting units.
- Lift-Gate Footrest – for easy access to the center cutting unit.
- Large, Balloon-Style Tires – that are gentle on turf.

*Verticutting with the Engine/Generator model only.

NEW
Radius Dependent Speed (RDS) System for Optimal Perimeter Cut

Clip Rate: Maintains consistent cutting unit clip rate in turns on each individual reel
Lift-In-Turn: Feature that provides a level cut from side to side, particularly in turns
Wheel Speed Control: Individual wheel speed control during turns for reduced wheel scrubbing
Greensmaster® TriFlex® Series

Greensmaster TriFlex

Unparalleled Cutting Performance – Double A-Arm™ Suspension and Flex Technology allow cutting units to closely follow turf delivering the productivity of a rider with the precision of a walker.

Highly Productive and Versatile – Tool-Free, Quick-Change cutting units remove in minutes making it easy to swap cutting units with attachments for the ultimate in versatility and productivity.

Lift-In-Turn™ – Maintains a consistent, level cut on the clean-up pass.

More Power and Performance – 21 hp (15.6 kW) Vanguard® Twin gasoline engine and 24.8 hp (18.5 kW) Kubota® diesel engine have ample power for any application.

Light Footprint – Large, turf-friendly tires distribute weight evenly across the machine’s tire footprint to minimize tire marking.

Easy to Service – Maintenance enhancements such as the Tool-Free, Quick-Change cutting units, no daily grease points and Lift-Gate Footrest save technicians time.

Greensmaster TriFlex Hybrid

Cutting Performance – Identical cutting performance and operator controls as the TriFlex hydraulic models.

Highly Efficient Electrical Components – Custom-designed components are highly durable and provide ample power for any mowing application or verticutting, on or off the green.

On-Board Energy Storage – Provides additional power during peak demands.

EnergySmart® – Features that save time and energy, and enhance productivity and turf health combined make the TriFlex Hybrid the first product to earn the EnergySmart label from Toro.

Greensmaster 3150-Q/3250-D

Legendary Quality of Cut – Known for excellence in quality of cut and reliability.

Proven Performance – Dependable and reliable performance for any mowing task on or around the green.

More Power – The 3250-D is equipped with a 24.8 hp (18.5 kW) Kubota® diesel engine for superior performance and power.
Reelmaster® 3100-D Sidewinder®
The Reelmaster 3100-D is a unique triplex mower designed for superior performance on the golf course. The optional Sidewinder® cutting units can be shifted right and left, on the fly, for increased reel overhang and less turf wear-and-tear.

Toro® Trim & Surrounds Mowers
When you need a reel trim mower whose versatility, performance and after-cut appearance is second to none, the Toro® Reelmaster® 3100-D is the clear choice. With Sidewinder® technology, Toro pioneered the ability to shift cutting units on the fly from side-to-side, reaching turf areas that other mowers simply cannot. It’s ideal for mowing around greens and bunkers where conditions can be challenging but when precision control is an absolute must. Add a triplex chassis configuration and Toro’s exclusive EdgeSeries™ cutting units and you get an exceptional performing, highly maneuverable reel trim mower that consistently delivers a superior after-cut appearance, day after day.

Groundsmaster® 3500-D Sidewinder®
The Groundsmaster 3500-D, with Toro’s innovative Sidewinder® cutting system, shifts the Contour Plus™ cutting units from side-to-side to cut hard-to-reach turf. The 3500-D features a 68-inch (173 cm) width of cut and full time 3-wheel drive provides superior operator control.

Groundsmaster® 3200/3300
The Groundsmaster 3200/3300 delivers unparalleled productivity. Featuring a powerful 37.4 HP (27.9 kW) or 24.7 HP (18.4 kW) engine, CrossTrak® all-wheel drive and legendary Groundsmaster decks, the Groundsmaster 3200/3300 makes quick work in even the toughest terrain while delivering an exceptional quality of cut.

ProLine® H800
The Toro ProLine H800 direct collect rotary mower with high-lift dump mechanism was engineered for unmatched collection performance. Featuring a powerful Yanmar® 24.7 hp (18.4 kW) diesel engine; fast groundspeed up to 9.3 mph (15km/h); our innovative Smart Airflow direct collection design; and 77” (1.95 m) high-lift system that dumps clippings directly into truck beds or trailers, the ProLine H800 can mow, collect and dispose of up to 3 acres (12,000 m2) of material per hour.

Groundsmaster® 360 Quad-Steer™
The Groundsmaster® 360 maneuvers in close around trees and fences, so there’s less trimming to do later. Fast, efficient and versatile, it features multiple deck options from 60-100 inches (1.52-2.54m) – ideal for secondary roughs, trimming around trees and clubhouse lawns. Need to cut back native grasses? Simply adjust the height of cut from 1 to 6 inches (2.5-15.2 cm) to fit your needs.
Reelmaster® 5010-H
The Reelmaster 5010-H gives you the power and performance you want with the fuel efficiency and reliability you need. Through its exclusive PowerMatch™ system, the Reelmaster 5010-H utilizes the power of a diesel engine in combination with a battery pack to supply over 40 hp (29.8 kW), but only when conditions require. Electric motors on the cutting units, which feature low-friction seals and bearings, improve performance and reduce power requirements. The result is increased fuel efficiency, quieter operation, significantly fewer hydraulics and an unmatched quality-of-cut with EdgeSeries™ reels.

Reelmaster® 3550-D
The Toro® Reelmaster® 3550-D floats effortlessly over contours in fairways and green surrounds. With a productive 82” (2.1m) cutting width, our new EdgeSeries™ reels, turf-friendly tires, the superior traction of a Series/Parallel 3-wheel drive system, and a weight of less than 2,000 lbs. (907 kg), the Reelmaster 3550-D is engineered to make a big impression...without leaving one.

Reelmaster® 3555-D/3575-D
The Reelmaster 3555-D and 3575-D fairway mowers are 20% lighter and much more compact than traditional fairway mowers from Toro and others. The lighter weight combined with a highly productive 100-inch (2.54m) cutting width, the improved maneuverability of a 3-wheel drive compact chassis design, EdgeSeries™ reels and several other key features – take this fairway mower into a class of its own.

EdgeSeries Reels
Toro EdgeSeries reels represent the next generation of cutting quality and durability with enhanced edge retention. In addition to new reel materials, the EdgeSeries incorporates new reel geometry and changes in the manufacturing process that result in a more consistent aftercut appearance.

Reelmaster® 5010 Series
Unrivaled productivity with a 100-inch (2.54m) cutting width, superior after-cut appearance, EdgeSeries™ reels, and simplified maintenance. Discover these and any of the hundreds of other reasons why the top golf courses in the world choose the Reelmaster 5010 series for picture perfect fairways and unmatched value.

Reelmaster® 7000-D
The Reelmaster® 7000-D is a multi-use, heavy-duty reel mower designed for productivity and performance in the most extreme conditions. This mower has it all – power, productivity of a maximum 126-inch (3.2m) cutting width and provides a superior aftercut appearance. Significantly reduce the time needed to scalp in preparation for overseeding and in verticutting operations.
Groundsmaster 1200

The Groundsmaster 1200 delivers an unparalleled combination of productivity, durability, and superior cut. It features a 12-foot (3.7 meter) width of cut and can mow up to 9.8 acres (4 hectares)* per hour. Remaining true to Groundsmaster’s unmatched reputation of durability, the 1200 was designed for years of reliable mowing. Its spindles are the same as Toro’s large rotaries and capable of withstanding the roughest conditions. The 1200 delivers an evenly-cut, professionally-striped look to large open spaces.

Groundsmaster Contour Family

Since 1973, Toro Groundsmasters have been proven on the world’s top golf courses, delivering consistent, clean cuts and breathtaking roughs. But we’re not satisfied. That’s why Groundsmasters are engineered with innovations like Sidewinder® cutting units for precise trimming, CrossTrax® all-wheel drive for superior traction, and SmartCool™ for unsurpassed cooling performance. No matter which Groundsmaster you choose, you’ll get the legendary performance that makes this an unbeatable value.

The Workman GTX is a work vehicle that boasts an unequalled combination of comfort, power, utility and control, making it simply superior to the competition. Its increased power, improved steering and exclusive suspension and braking systems make the Workman GTX the most versatile, practical and comfortable utility vehicle in its class. With its narrow 47.1” (119.6 cm) width, gas or electric power, and hundreds of configurable options, attachments and seating choices, running to different jobs around the course has never been so productive. So whether you are setting cups, checking on irrigation, or moving people or materials, the Workman GTX has the power and versatility to get the job done right.

Features:

• **Versatility** – The Workman GTX is adaptable to almost any task. Two, four or six-seat configurations come with bench or bucket seats. Front and rear attachment points for garbage cans, hose reels or walk spreaders free up the bed for more hauling capacity. Steel 4 and 6-foot (1.2 m & 1.8 m) flat beds are also available.

• **Power** – Whether you choose the 429 cc EFI gasoline, 48-volt AC, or Lithium-Ion powered electric Workman GTX, power and performance come standard. An improved power to weight ratio boosts payload capacity and productivity.

• **Control** – An automotive-grade rack and pinion steering system provides more control and lowers steering effort, while operating loaded or empty. The Workman GTX also features class-exclusive hydraulic disc brakes. Minimal maintenance, no cable adjustment and less pedal force than mechanical cable brakes affords the Workman GTX reliable and consistent stopping power.

• **Suspension** – Coil-over shocks on all four tires deliver greater suspension travel and adjustability resulting in a smoother ride and minimized operator fatigue. It is also the only vehicle in its class to feature a split frame to further increase ride comfort.

• **Durability** – Virtually unbreakable composite exterior components and a powder coated frame and underbody give the Workman GTX superior durability. Run it hard, day after day.
Workman GTX Utility Vehicles

**Workman GTX Lithium-Ion Lifted & GTX EFI Lifted**

The new Workman GTX EFI and Workman GTX Lithium Lifted models each provide new features while maintaining the comfort, control, power, versatility, and ease of maintenance that sets the GTX apart.

**Increased Ground Clearance** – Improve your ride over uneven and rough terrain while also avoiding debris with an additional 3” (7.6 cm) of ground clearance.

**Turf Friendly Tires** – Protect your turf and ride in style with 22” (55.9 cm) turf tires and modern 12” (30.5cm) aluminum wheels.

**GTX Lithium-Ion Power**

- **Cargo Capacity** – At 800lbs (363.8 kg), the GTX Lithium provides you with the largest cargo capacity of any lithium-ion vehicle in its class.
- **Maintenance-Free** – Lithium-Ion packs require no maintenance which lets you spend less time checking batteries and more time checking tasks off your to-do list.
- **Extended Battery Life** – Lithium-Ion battery packs give you the power for long days and reduced charging time for short nights.
- **Onboard Charger** – No need to keep track of your charger, it is onboard and ready to be connected to any standard power outlet anytime, anywhere.
- **Reduced Weight** – The GTX Lithium is 26% lighter than a traditional electric vehicle, making it nimble while still packing plenty of all-day power.
Workman® HD Series

Get more work done with the versatile Workman HD series utility vehicles. Industry-leading towing capacity of 3500 lbs. allows you to safely tow a ProPass 200 top dresser full of sand. Four-wheel hydraulic brakes and payload of up to 3,300 lbs. (1497 kg) enables you to heap it full of sand, sod or dirt without hesitation. The DeDion rear axle with I-beam isolates and protects transmission, engine and main frame from heavy loads. Independent, double A-frame front suspension provides exceptional ride quality and comfort and the independent suspension absorbs rough terrain – not the operator.

Model Options:
- HD – Two-wheel drive, Kohler® 674cc air-cooled
- HDX – Two-wheel or four-wheel drive  Kubota® 962cc liquid-cooled EFI
- HDX-D – Two-wheel or four-wheel drive  Kubota® 898cc liquid-cooled diesel

Workman® MDX Series

Superior ride quality is achieved through independent front suspension, coil over shocks, and an extended cab design. The active in frame Twister™ joint improves traction and stability while minimizing turf damage. Combine all of these features including a payload of up to 1,650 lbs. (750 kg) and four-wheel hydraulic brakes letting you to get more done safely in less time with less fatigue.

Model Options:
- MDX – Briggs & Stratton® 480cc
- MDX-D – Kubota® 600cc

Outcross 9060

The Outcross 9060 is an invaluable tool in the long-standing battle Turf Managers face to “do more with less.” This machine is a time-saving, easy-to-use, multi-purpose, turf-friendly workhorse that brings year-round flexibility, consistency and productivity to turf maintenance operations. Get ready to do more. The Outcross is the first machine of its kind to be purpose built for the management of fine turf.

Its balanced design, four-wheel steer, and four-wheel drive make it extremely gentle on turf. Keep busy year-round by utilizing Outcross’s 3-point hitch, drawbar, or front loader. Mow grass, spread fertilizer, load sand, haul a pallet of sod, aerate, topdress, remove snow and ice, blow leaves, prune roots, spread seed, tow a trailer, sweep a path, chip wood, and much, much more.

Intuitive automotive-style controls and one-time parameter setup keeps operations simple and efficient.

Multi Pro® Sprayers

Multi Pro® 5800 with GeoLink®
Precision Spray System

GeoLink is the industry’s only turf-based precision spray system. Turf professionals will benefit from substantial chemical savings thanks to individual nozzle control and sub-inch accuracy. Reporting is simple with GeoLink: application rates, coverage maps, area and volume data are easily downloaded for thorough record keeping. The weatherproof touchscreen is rugged enough to withstand challenging conditions and makes application programming easy and straightforward.

Multi Pro® Accessories

- GeoLink® AS™, Toro’s exclusive autosteer system for the Multi Pro 5800 with GeoLink, delivers maximum productivity and optimal coverage by automatically steering the machine, ensuring full boom utilization and efficient spray application.
- ExcelaRate™ Rate Control System makes achieving precise application rates simple and repeatable. Step-by-step calibration and memory of your two most commonly used rates saves time and increases accuracy. Developed by Toro exclusively for turf and standard on all Multi Pro 5800 machines!

- NozzAlert® Nozzle Flow Monitoring System brings peace of mind to spray applications by alerting the operator to nozzle flow disparities caused by totally or partially blocked, broken, missing, or worn nozzles. From the comfort of the operators seat, a simple display gives visual and optional audible alerts when flow disparities are detected, allowing the operator the opportunity to correct before mis-application and resulting turf damage.

- Cleanload™ Eductor is an on-board mixing station for safely loading any product without the need to first mix a slurry.
- Fresh Water Rinse Kit simplifies and automates the triple-rinse process, saving hours upon hours of clean-up time.
- Covered Boom Shroud mounts to existing boom and minimizes spray drift in breezy conditions.
- Ultra Sonic Boom Kit automatically maintains optimal boom height in undulating turf conditions.

Also Available: Enclosed Cab, Sunshade Canopy, Electric Hose Reel, Pro Foam Marking Kit, Rear Work Light Kit and Single Spray Nozzle Kit.

Multi Pro® 1750 with GeoLink™

Earning the market leader position in turf vehicle sprayers comes from listening to what your customers truly want in a sprayer. Toro’s 175-gallon (662 liter) dedicated sprayer is the culmination of hundreds of hours of insightful customer input. This proven sprayer uses an advanced spray system design, combined with cutting-edge sprayer controls and productive vehicle features to create the most advanced, efficient and accurate 175-gallon (662 liter) sprayer on the market. From aggressive agitation, faster response, consistent and accurate application rates, and intuitive rate set up, this sprayer has it all.

Multi Pro® WM

The Multi Pro WM advanced spray system for Toro’s Workman® HD or the HDX utility vehicle leverages the reliable system design found on the Multi Pro 5800 and Multi Pro 1750, and offers flexibility not found with dedicated spray vehicles. Considerable effort went into making the Multi Pro WM easy to install and easy to remove, allowing users to convert their spray vehicle to a topdresser vehicle for example, or simply back to a utility vehicle with a bed. All of the same popular attachments found on the dedicated sprayers are also available for this 200-gallon (757 liter) bed-mounted sprayer.

toro.com/multipro
GreensPro® 1260 Greens Roller

The GreensPro 1260 delivers exceptionally smooth and fast greens with a superior operator platform. The split, contour following smoothing rollers perfectly follow undulations delivering exceptionally smooth putting surfaces. The operator platform is fully adjustable for unmatched comfort and operator safety. The new transport system featuring a QuickLatch coupler will make transporting from green to green unbelievably quick and simple.

HoverPro® Series

The Toro HoverPro is perfect for maintaining turf on steep slopes, tight undulations, areas near water or bunker lips. A light footprint makes the HoverPro easy to operate while its rugged design ensures years of quality performance.

• Direct drive traction roller design dramatically reduces maintenance with improved reliability
• Offset smoothing rollers deliver unmatched roll consistency and will not leave a ribbon of unrolled turf
• Fully adjustable operator platform offers comfort and safety
• Independent, articulating smoothing heads follow undulations, preserving natural contours
• Remarkably light tongue weight makes mounting and dismounting easier than ever
• Industry-leading roll-to-transport conversion can easily be done regardless of operator size

GreensPro® 1260

The split rear-roller with integrated differential enables tight turns with minimal risk of turf damage.

ProStripe® 560

The ProStripe 560 combines exceptional turf striping with the simplicity of a walk power mower. It is the ideal mower for striping smaller turf areas and can easily maneuver into tight locations.

Cutting Systems

Nylon Wire – (HoverPro 400)
Steel Cutting Blade – (HoverPro 450 & 550)

Specialty Mowers
**Sand Pro® Bunker Rakes**

**Sand Pro 2040Z**

The Sand Pro 2040Z mechanical rake is unlike anything else in the marketplace; a zero-turn mechanical groomer delivering unmatched maneuverability and productivity. This unique machine is a daily use bunker rake that will reduce golf course's labor costs for both mechanical and hand raking of bunkers. The “flex” raking system with the patent-pending “lift-in-turn” feature enables an operator to turn tightly in bunkers without leaving unraked teardrops or tire marks. The nimble Sand Pro 2040Z will save you valuable time in your workday, improving bunker playability and consistency.

**Sand Pro 3040/5040**

It’s time to demand more from your bunker rake. With the exclusive Quick Attach System™ (QAS) offering tool-free, quick attachment change outs and over 25 valuable attachments, the Sand Pro 3040 and 5040 are versatile utility vehicles with as many uses outside the bunker as in it. The Sand Pro 5040’s optional front QAS provides added flexibility and exclusive steerable front attachments for surgical precision. The Toro Sand Pro keeps bunkers in tournament condition every day.

The QAS Flex Tooth Rake offers productivity and performance advantages to your daily grooming. This Sand Pro attachment features a flexible rubber groomer delivering an exceptional groom while being gentle on turf and bunker liners.

**Sand Pro® 2040Z ProCore® 648 & 1298**

The Sand Pro 2040Z mechanical rake is unlike anything else in the marketplace; a zero-turn mechanical groomer delivering unmatched maneuverability and productivity. This unique machine is a daily use bunker rake that will reduce golf course's labor costs for both mechanical and hand raking of bunkers. The “flex” raking system with the patent-pending “lift-in-turn” feature enables an operator to turn tightly in bunkers without leaving unraked teardrops or tire marks. The nimble Sand Pro 2040Z will save you valuable time in your workday, improving bunker playability and consistency.

**ProCore® Aeration Solutions**

**ProCore® 648**

The Toro ProCore 648 aerator, with its efficient 48” (122 cm) aeration swath, delivers maximum productivity and exceptional aeration. From the innovative wheel placement within the aeration path to the TrueCore™ ground-following system that maintains consistent aeration depth, the ProCore 648 sets the standard in greens aeration. The six precision-balanced coring heads make aeration remarkably smooth. Efficient, productive and innovative - that's what makes the ProCore 648 the superior choice.

**ProCore® SR Series deep tine aerators**

ProCore SR Series deep-tine aerators alleviate subsurface soil compaction, helping to create an environment for turf to thrive. These durable and time-tested products are capable of withstanding the most extreme aeration conditions. From lightweight, precision machines to robust, heavy-duty machines to break up soil on even the most compact surfaces, the ProCore SR Series deep-tine aerators are the ultimate choice for performance and quality.

**ProCore® 864 & 1298**

The same ground-breaking technology that allowed the ProCore 648 to revolutionize greens aeration is available for large-area applications. The precision-balanced coring heads run smoothly, even in the raised position with the PTO engaged. This will save you valuable time in turn-arounds and avoiding ground obstacles. The ProCore 864 (64”/163 cm) and ProCore 1298 (98”/249 cm) deliver exceptional aeration and productivity in an easy to use, robust design.

**Visit toro.com or call your local distributor for a full list of available accessories and attachments.**
Pro Pass™ 200
Healthy turf starts with consistent topdressing. Now it’s easy to achieve your desired spread time after time with the ProPass 200. The ProPass 200 ensures a consistent spread pattern, from light to heavy, every time with a patented color-coded ‘drop zone’ adjustment system. Just slide the twin spinner assembly into place, and you can be sure your turf is getting the optimum treatment. The precisely defined spread area makes it easy to match edge line to edge line with each pass.

Pro Force®
The Pro Force delivers impressive air power for fast removal of grass clippings, leaves, divots, aeration cores and other debris from your golf course. A newly redesigned handheld wireless remote control makes it incredibly easy to use. Rotate the nozzle 360 degrees in either direction, adjust the engine speed up or down, and start and stop the engine with the remote control.

Versa Vac®
The Versa-Vac, the largest Toro turf sweeper, has an impressive 6.5 cu. yd. (5 cu. m) capacity. Factor in the leaf-shredding action of the impeller fan and you’ll hardly ever have to stop to unload. The cargo door and dump operate hydraulically with controls that sit directly behind the tractor seat for easy access. The hydraulics, sweeping decks and impeller fan are all powered by a 540 PTO drive with enough muscle to sweep up any debris.

MH-400 Material Handler
Get ready to take productivity to new levels with the Toro MH-400. This proven workhorse excels at a wide range of tough jobs, from transporting materials to cleanup, construction, daily maintenance, and large area topdressing. If no optional accessories are installed, the MH-400 is the ultimate work trailer. But you can quickly and easily transform it with a swivel conveyer, or the twin spinner attachment which turns the MH-400 into a large area topdresser.

Pro Sweep® Rake-O-Vac®
The Pro Sweep is the fastest way to get your course back in play after aeration. A handheld controller allows the operator to wirelessly control sweeping and dumping of the unit combined with the ability to move the sweeper from tow to offset position without leaving the tow vehicle driver’s seat.

The Rake-O-Vac delivers a clean sweeping environment due to the airflow system that directs the dust downward at ground level. A flex tip reel gently lifts wet or dry debris with an optional broom that works well for sweeping Bermuda grass during scalping operations.

ProPass 200 bed model
Topdresser 2500
Topdresser 1800
MH-400 material handler
RotaQuake™ 630
The Bullseye RotaQuake 630 is an aerator that decompacts the soil using a set of rotating steel blades. As these blades cut cleanly through the soil, they create a wave action that shatters compacted areas and opens up the subsoil. The RotaQuake can work at depths up to 10” (25.4 cm) with minimal to no surface disruption to keep your turf ready for play. The rear roller smooths surface behind rotating blades and the integrated legs make unhooking and storage easy.

NuSurface™ 470/790
The Bullseye NuSurface 470 & 790 are used to fraise mow, flail mow, level, de-thatch, and renovate turf areas, as well as harvest sprigs. These products are ideal for use on golf courses and are quickly becoming the go-to grass removal tool for fast and efficient resurfacing projects. Its rotary action removes material and transfers it onto a conveyor system for disposal, leaving behind a smooth surface, immediately ready for sod or seeding.

AccuraSeed™ 620
The AccuraSeed 620 plants grass seed directly into the ground, providing outstanding seed-to-soil contact and unmatched germination. The simple, yet effective twin discs open a slit for seed placement allowing for multiple passes without disturbing dormant or winter damaged surfaces. The large capacity hopper with windows to monitor seed level allows for less frequent refills, resulting in greater productivity. A proven seed size adjustment and metering design allows the machine to provide an infinite range of seeding rates with all seed types, from very large to the very smallest of seed varieties.

RapidSeed™ 430/590
The Bullseye RapidSeed 430 and 590 are ideal where economy and random seed dispersion is important. Both RapidSeed overseeding machines offer the same accurate means to produce thousands of holes, deliver the seed and brush in, all with a single machine. Available in two widths, there is a unit for tighter, more undulating areas or larger areas. The spikes are conical-shaped, so more seed actually drops into the holes. The seeds drop when the side wheel turns, so there is no spillage of seed when the machine is not in operation. An optional replacement rear spiked roller can be added to double the number of holes per pass. The optional hydraulic lift wheel kit allows the seeder to be towed behind even a Workman® HDX and provides improved ground-following ability.

QuickGroom™ 710
The Bullseye QuickGroom 710 is designed to groom, and evenly incorporate topdressing material quickly and efficiently. The combination of angled and straight brushes both move materials side to side and leave a smooth, finished surface. Optional adjustable depth spring tines can be used to lightly de-thatch natural grass. An optional electric lift wheel kit expands your tow vehicle options to include even the GTX line of utility vehicles. Manually folding side wings can be added, converting the groomer to over 13’ (4 meters) wide, increasing productivity for fairways and any other large turf areas.

QuickGroom™ 700
For brushing and stripping of natural turf, nothing beats the proven Bullseye QuickGroom 700. The highly-effective triangular arrangement of the brushes will redistribute topdressing material side to side while standing up and grooming each grass blade for an attractive finish. Long-wearing poly-bristles quickly and efficiently brush topdressing to an even and level finish.
Local support you can depend on, year in and year out

A commitment to you and your club’s success

Outstanding playing conditions and happy members

What Matters Most to You Matters Most to Us.

This is more than equipment; it’s an investment. In your course. Your crews. And your peace of mind. Keep your operation running smoothly with some of the most dependable products in the business, backed by local support that’s second to none.

Call your local Toro distributor today: 800-803-8676
Genuine Toro Quality

- **Parts Availability** - Most local distributors deliver parts within 1–2 days. Toro backs this promise with 48-hour delivery support option.
- **OEM Quality** - Toro genuine service parts are the same parts used on the original piece of equipment, ensuring maximum performance with less downtime.
- **Unparalleled Customer Service** - Count on dedicated support for your Toro parts needs.
- **Peace of Mind** - With Toro genuine parts, you get the right part with the correct specifications. There’s no need to wonder if the part will work.

Toro Protection Plus™

- **Peace of Mind** - Comprehensive or DriveTrain only plans for up to 5 years or 5,000 hours
- **Seamless Protection** - Coverage begins at expiration of the Toro Standard Warranty
- **Dependable Repairs** - Repairs by certified Toro technicians using only Toro Genuine Parts

Budget Security

- **Zero Deductible** – 100% coverage of parts and labor + transportation benefit
- **Minimized Risk** – Provides a known cost for unpredictable breakdown repairs
- **Maximized Control** – Plans can be purchased anytime within the standard warranty

To best protect your investment and maintain optimal performance of your turf equipment, count on Toro Genuine Parts. When it comes to reliability, Toro delivers replacement parts designed to the exact engineering specifications of our equipment. For peace of mind, insist on Toro Genuine Parts.
Lynx® Mobile Apps

Lynx® Mobile Apps enable you to control your irrigation system from your smartphone or tablet. Available for both iPhone®* and Android™* devices, Lynx Mobile Apps offer map and numeric based interfaces for manual irrigation, as well as an easy way to enter or edit LSM addresses.

Lynx® Central Control enables the integration of other critical systems to manage your irrigation system with un-paralleled performance, un-matched efficiency and the most comprehensive data access in the industry.

TURF GUARD® WIRELESS MOISTURE SENSOR
- View current conditions and historic trends
- Achieve, fully-informed, data-based irrigation decisions

PUMP STATIONS
- Obtain current status, alarm monitoring and notification
- Maximize wire to water efficiency
- Reduce energy costs
- Works with: MCI Flowtronex, Watertronics, Motor Controls or Grundfos

WEATHER STATIONS
- Use the weather data for irrigation scheduling
- Monitor and respond to rain fall by adjusting runtimes or suspending irrigation
- Works with: Campbell Scientific or Spectrum Technologies

FLOW SENSORS
- Monitor flow against Lynx scheduling to better detect pipe leaks
- Fine-tune sprinkler performance data to manage water utilization
- Works with: Toro, Bermad or Data Industrial

The Lynx® Central Control System integrates seamlessly with Toro’s Field Control options, enabling you to have the complete information needed to support your irrigation decisions.

TORO FIELD CONTROLS
Innovative, Flexible and Best-in-Class Field Control Options

LYNX Smart Satellite Control
Provides distributed control and added security via intelligent field controllers with an intuitive user interface
✓ Station Based Flow Management reduces water window and optimizes pump operation
✓ Current Sensing provides protection by monitoring each station output for proper amperage draw
✓ Stores and runs a fully flow-managed irrigation schedule in the event the central computer is offline
✓ Stand-alone capabilities enable manual irrigation directly from the satellite faceplate
✓ Station runtimes executed to the second to provide precise irrigation
✓ 2-way wired or wireless communication options enable flexible system design and installation

LYNX Smart Module
Provides direct control via intelligent modules installed inside or near each sprinkler
✓ All system components are below ground, which helps maintain course aesthetics
✓ Lowest cost system option due to reduced amount of wire
✓ Continuous 2-way communication and automated diagnostics ensure system integrity
✓ Best-in-class broadband lightning protection
✓ System can be expanded easily by adding modules to the wire path
✓ Lynx Smart Hub provides additional features and benefits

LYNX Smart Hub
Lynx Smart Hub is a new type of controller that adds security, programmability and sensing to the benefits and simplicity of a 2-wire system.
✓ Irrigation system can be segmented into manageable areas for simplified maintenance
✓ Provides for in-field manual operation or troubleshooting
✓ Stores and runs a fully flow-managed irrigation schedule in the event the central computer is offline
✓ Creates a convenient point of connection for soil, flow and status sensors

INFINITY® SERIES GOLF SPRINKLERS

Engineered for Today’s Challenges. Designed for Tomorrow’s Technologies.

The INFINITY® Series improves your course quality with less workload and most important, it keeps golfers playing. Calculate the money you’ll save by cutting sprinkler maintenance from hours to minutes.

Smart Access®
Provides top accessibility to all critical components.
☑ No digging or unsightly turf repair scars
☑ Pilot valve removable with water “ON”
☑ Lynx® Smart Module (LSM)
☑ Customizable marker
☑ No buried wire splices or ground faults
☑ Replaceable cover if damaged
☑ Increased labor efficiency
☑ Lower long term cost of ownership

2-Wire Module
Accessible from the top allows for LSM module retrieval, system troubleshooting and system repairs without digging!

TruJectory™ Adjustment of the Main Nozzle – 24 Positions from 7°-30°
From 7-30 degrees this patented feature in 1 degree increments puts water where you want it for maximum distribution uniformity. Adjust from the top of the sprinkler in seconds, wet or dry. This flexibility lets you tackle every obstacle on the course; wind, trees, bunkers, mounds and more.
Toro Professional Services

Toro University
Toro is committed to providing you with the information you want, when you want it, and how you want it. That’s why we supply learning opportunities and performance support to you in many different ways. Along with a complete selection of printed Service Manuals and Training Guides, we also provide information on CD-ROM, DVD, and on www.toro.com.

Toro Financing Solutions
Whether choosing maintenance equipment or irrigation components for a renovation, your Toro representative has experience and is trained to help you look beyond the simple financing of one item to the next, to looking at your longer-term equipment and economic needs. It’s not a one size fits all plan. Looking at the total cost of ownership will help you find the right acquisition solution for your course’s specific needs. Toro has partnered with the premier golf financing companies in the industry to meet your needs.

Toro Protection Plus™
To ensure your ongoing success and satisfaction with our products, Toro offers outstanding after-sale support like our exclusive Toro Protection Plus extended protection plan, the industry’s most comprehensive protection program. There’s no better way to protect your investment and stabilize your budget.
