

FieldClean™ 580

SYNTHETIC TURF CLEANER

FEATURES

- Superior Cleaning of Synthetic Turf Fields – loosens and effectively and cleans the infill, returning cleaned material to the playing surface, separating and removing large debris into a hopper for disposal.
- High-Flow Vacuum – increases cleaning effectiveness by removing and collecting hair, dust and other fine particles in a removable and washable vacuum bag
- Decompacts and Grooms Playing Surfaces – for improved playing conditions and field appearance
- Cleaning Depth and Aggressiveness Set By Field Manager – separate spring tine and brush depth adjustments provide consistent results from pass to pass
- Clean on Your Schedule – high productivity allows you to quickly clean your fields whenever needed

The All-In-One Synthetic Turf Cleaner.

Regular cleaning of synthetic turf is necessary to keep playing surfaces draining properly, in optimal playing condition and maximize their useful life. The Bullseye FieldClean 580 utilizes a row of spring tines that first loosen infill materials, embedded debris, hair and other fine materials up to a depth of 1" (2.5 cm). A highly effective, counter-rotating synthetic brush then lifts the debris and top layer of infill material from the turf and onto the adjustable angle vibrating sieve, allowing infill material to return to the field surface while debris, dust and hair are collected. The rear brush re-incorporates the infill material and leaves a freshly groomed surface.
