

RapidSeed™ 430/590

SEEDERS

FEATURES

- Working Speed of up to 7.5 mph (12 km/h) – *saves time and money*
- Quickly Adjust Calibration – *fast, easy and precise seeding rate adjustability*
- Large Seed Hopper – *less time spent on refills*
- Spiked Disk Roller – *random dispersment of seed with no drill lines*
- Ground-Driven Design – *fewer moving parts results in reduced maintenance and lower cost of ownership*
- Seeding Element Design – *works well with all varieties, providing great accuracy even with small bentgrass seed*

Efficient and Productive Overseeding.

The Bullseye RapidSeed 430 and 590 are ideal for sports fields and golf courses where economy and random seed dispersment is important. Both RapidSeed overseeding machines offer the same accurate means to produce thousands of holes, deliver the seed and brush in, all with a single machine. Available in two widths, there is a unit for tighter, more undulating areas or larger areas.

The spikes are conical-shaped, so more seed actually drops into the holes. The seeds drop when the side wheel turns, so there is no spillage of seed when the machine is not in operation. An optional replacement rear spiked roller can be added to double the number of holes per pass. The optional hydraulic lift wheel kit allows the seeder to be towed behind even a Workman® HDX and provides improved ground-following ability.
