GREENSMASTER®

800 · 1000 · 1600

Toro® walking Greensmaster mowers keep the score of the game in the golfer’s hands. Their industry-leading cutting units deliver the truest, most predictable ball roll on even the most contoured greens. They are ideal for perfectly manicured tee boxes, too. With operator-friendly designs and innovations, Toro Greensmaster mowers will give you a consistent, unmatched quality-of-cut – green after green.

EASY REEL TO BEDKNIFE ADJUSTMENT

Makes the reel to bedknife adjustment easy and most accurate with a “click type” adjustment. Prevents misadjustment while tightening counter nut.

EDGEMAX™ BEDKNIFE

Provides superior edge retention, performance and extended life with its hardened steel construction. Available for Greensmaster cutting units in Microcut or Tournament options to match your course conditions.

ACCESSORIES

TransPro 80 Trailer ▼

Safely and easily transports Toro walking Greensmasters to and from the green. The unique design protects your investments and keeps the adjustments intact. TransPro 80 transports a single Greensmaster mower.

TransPro 100 Trailer ▼

Transports two walk greens mowers for additional timesavings and productivity gains.

GREENSMASTER® EFLEX/FLEX

1800 • 1820 • 2120

In the world of greensmowing a Lithium-Ion battery powered Greensmaster eFlex that can cut up to nine typical greens on a single charge is a game changer. It's as simple as "Mow, Charge and Repeat". And that's only one part of the eFlex innovation story that promises to improve your playing surfaces and save you money over the life of the product. Improved controls, an automated EZ-Turn feature, better clippings capture, simplified belt-drive transmission, kick-stand assist, an advanced battery management system and many other features combine to make this an outstanding and environmentally-friendly greensmower value.

Learn more at
Toro.com/GOLF

- 1 Simple Poly-V Belt Drive Transmission**
Transfers power to the reel and traction drum both when and where it is needed. The common drive system delivers power to both the traction drum and reel to maintain a constant clip regardless of ground speed.

- 2 Advanced Lithium-Ion Battery Technology**
Provides enough charge to mow up to 4,180 m² (9 average greens) on a single charge. One battery is designed to last five years and deliver ample power to cut greens and accommodate key accessories such as groomers and light kits. No CO₂ emissions, no toxic waste to dispose of, no liquid levels to monitor, no terminals to clean, no battery pack change outs during the work day, and the worry-free list goes on.

- 3 Built-in Clip Adjustments**
Included on each new Flex™ walker, the six easy to configure clip rate options accommodate specific cutting heights and playability requirements for any event or desired playing condition. Three colour-coded pulleys are quick to reconfigure with a single spanner, to set your clip rate to achieve the desired result.

- 4 Patented EZ-Turn**
Automatically slows the unit when turning at the end of a mowing path and automatically speeds up again after a controlled turn on the return pass. Improved control reduces damage to turf, particularly in tight turns near a bunker or hazard, and produces better alignment on the return pass without sacrificing productivity.

GREENSMASTER®

3120 · 3150-Q · 3250-D

Get the precision cut you want from a highly productive Toro® Riding Greensmaster. In addition to their lightweight design, their power, comfort and performance make them the preferred choice. Greenkeepers know they can count on Toro triplex greens mowers to run quietly, work quickly and cut superbly, season after season.

THE REEL STORY

Patented DPA Cutting Units are precision manufactured for perfect alignment to provide the highest quality of cut and minimal adjustments. Choose from an 8, 11 or 14-blade reel to achieve your desired cut.

EASY REEL TO BEDKNIFE ADJUSTMENT

Makes the reel to bedknife adjustment easy and most accurate with a "click type" adjustment. Prevents misadjustment while tightening counter nut.

PERFECT TRIANGLE WHEEL STANCE DESIGN

Places the rear wheel track within the radius of the front wheels, which prevents accidentally dropping the rear wheel into an adjacent sand bunker while making the turn for the next mowing path.

EDGEMAX™ BEDKNIFE

Provides superior edge retention, performance and extended life with its hardened steel construction. Available for Greensmaster cutting units in Microcut or Tournament options to match your course conditions.

EdgeSeries™ Reels

NEW!

Toro EdgeSeries reels represent the next generation of cutting quality and durability with enhanced edge retention. In addition to new reel materials, the EdgeSeries incorporates new reel geometry and changes in the manufacturing process that result in a more consistent aftercut appearance.

Now available on all Greensmasters and Reelmasters®.

GREENSMASTER® TRIFLEX™

3300 · 3320 · 3400 · 3420

Double A-Arm Suspension and Flex Technology allow cutting units to closely follow turf delivering the productivity of a rider with the precision of a walker. Improve your putting surface and your bottom line with the Toro® Greensmaster TriFlex®, available in petrol, diesel and hybrid models. Highly productive, extraordinarily versatile and simple to service, this riding mower is certain to elevate the standards by which all other riding greensmowers will be measured.

DOUBLE A-ARM SUSPENSION SYSTEM

Maintains full flotation range to prevent gouging or scalping when mowing over undulations.

PROVEN FLEX SUSPENSION (PATENTED)

Provides superior contour following capability with an integrated Flex linkage system to allow cutting units to pivot around the centre of the front roller to master undulations and prevent side-to-side scrubbing of the putting surface.

BALLOON STYLE TYRES

Deliver uniform loading across the entire footprint to eliminate sidewall loading that can create visible tyre tracks.

TOOL-FREE, QUICK-CHANGE CUTTING UNITS ▼

Can go from cutting greens at 1.6 mm to cutting a Fairway at 19 mm in just a few minutes. The tool-free, quick-change cutting units make it as easy as 1-2-3.

GROUNDMASTER® & REELMASTER®

GROUNDMASTER 3280-D · 3400 · 7210 · 360

REELMASTER 3100-D

Since 1973, Toro® Groundsmasters have been proven on the world's top golf courses, delivering consistent, clean cuts and breathtaking roughs. Innovative Groundsmaster rotary mowers provide versatility with a compact footprint.

When you need a reel trim mower whose cutting quality and versatility is second to none, the Toro Reelmaster 3100-D is the clear choice. It's the only reel mower with Sidewinder® technology that slides the cutting units side-to-side, on the fly, to reach turf that other mowers can't. It's perfect for mowing around greens and bunkers where precision control is a must.

THE INDUSTRY'S TOUGHEST SPINDLE ASSEMBLY

Takes workloads that would destroy most spindle assemblies. A cast iron housing with a massive 23 cm diameter base absorbs impacts and distributes the load across the robust deck shell.

MULTI-USE VERSATILITY QUICK ATTACHMENT SYSTEM (QAS) WITH SEASONAL ATTACHMENTS

- Debris blower with rear mounted Quick Attach System (QAS)

QUAD-STEER TECHNOLOGY

Delivers true all-wheel cornering to the Groundsmaster 360. When turning the steering wheel, the inside and outside tyres pivot around a common point so you can make tight turns or trim around obstacles without turf damage.

SIDEWINDER WITH DPA CUTTING UNITS

Cutting units shift from side-to-side for exceptional trim capabilities. DPA cutting units are quick and easy to adjust.

The Castle Course, St. Andrews, Scotland

GROUNDMASTER®

GROUNDMASTER 3500-D · 4300-D · 4500-D/4700-D

With the unique landscape of today's courses, trim and rough areas can be the most challenging areas to mow. Toro® Groundsmaster products are up to the task with a variety of mowers in every size, power and style. Choose any one of our highly-productive rotary mowers and get the rough cut in record time.

SMARTCOOL® SYSTEM

Keeps Toro's Groundsmaster 4500-D and 4700-D on the job and moving forward. Before the engine gets too hot, SmartCool briefly reverses the cooling fan to blast chaff and debris from the intake screens.

SMARTPOWER®

Prevents the machine from bogging down in heavy cutting conditions and keeps the blades at optimum cutting speed by automatically reducing ground speed to deliver more power to the blades. The SmartPower™ system is available on the Groundsmaster 4000-D, 4100-D, 4500-D, and 4700-D.

GROUNDMASTER®

GROUNDMASTER 4000-D/4100-D · 5900 · 5490 & 7490

Get the job done quickly, efficiently and safely with the Toro® line up of large area mowers. Whether you have thick grass or challenging conditions these high capacity mowers have the power to get the rough cut in record time.

Groundsmaster 4000-D / 4100-D ▲

Power where you need it most - to cut grass, no matter how challenging the conditions. With SmartPower™ technology, high engine torque and patented, efficient deck drive systems, these mowers are designed for productivity. Excellent trimming capability to manoeuvre around obstacles with ease, mow a 0 uncut circle.

Groundsmaster 5900 ▲

One of the largest, most-powerful mowers available. Yet it still offers surprising manoeuvrability and versatility for a wide range of applications.

TM5490 & 7490 ▲

These 5 or 7 unit mowers are designed for high output tractor drawn gang mowing. The high capacity hydraulic system powers both lift and cutting units to provide optimum performance in heavy wet growth as well as on finer quality playing surfaces.

SAND PRO®

SAND PRO 2040Z · 3040 · 5040

The Toro® Sand Pro family has everything to get your course ready for play. With a variety of attachments, the Sand Pro is a versatile utility vehicle with as many uses outside the bunker as in it. The Toro Sand Pro keeps your bunkers in tournament condition every day.

QUICK ATTACH SYSTEM (QAS)

Allows Operators to easily switch from one attachment to another in less than a minute, with no tools required! Match the machine to the environment to get your course back into playing condition quickly. Rear QAS standard on the Sand Pro 3040 and Sand Pro 5040, and the front QAS is optional on the Sand Pro 5040.

3-WHEEL DRIVE SERIES/PARALLEL TRACTION DRIVE

Improves traction in wet or heavy working conditions to get the job completed quickly. In traditional 3WD units, all traction effort is lost as soon as one wheel slips. Series/Parallel ensures that you always have tractive effort with at least one wheel to keep your unit from getting stuck and losing precious time.

Sand Pro 2040Z ▲

The Sand Pro 2040Z is unmatched for manoeuvrability and productivity with power steering via independent control sticks. The new "flex" raking system with "lift in turn" feature enables an operator to turn tightly in bunkers without leaving unraked teardrops or tyre marks.

Sand Pro 3040 ▲

The Sand Pro 3040 is a solid performer that offers 3-wheel drive, a 11.9 kW (16 hp) engine and special acceleration valves for smoother start ups and fewer spinouts.

Sand Pro 5040 ▲

The Sand Pro 5040 is a powerful unit with a 13.4 kW (18 hp) engine. The Series Parallel 3-wheel drive traction system virtually eliminates spinouts and equips it to handle the most demanding bunkers.

SPECIALTY PRODUCTS

DEBRIS EQUIPMENT

PRO SWEEP® · PRO FORCE® DEBRIS BLOWER

RAKE-O-VAC® · VERSA-VAC

From tee to green and everything in between, you can count on Toro®. Efficiently collect and dump aeration cores with the Pro Sweep. Clear dew and debris from greens and fairways with Toro debris blowers. Dispose of leaves and debris in the autumn with Toro vacuums and sweepers. Whether you have a PTO drive or want a self-powered machine, Toro has a machine for the job.

WIRELESS REMOTE CONTROL

Makes operating the Pro Force as easy as pushing a button. In addition to nozzle direction and throttle speed adjustments that can be made while towing the machine, the wireless remote control also provides convenient start/stop functionality.

TURBINE-TYPE FAN ASSEMBLY DESIGN

Allows for greater air flow to move debris further and finish the job faster. The Pro Force is designed for more productivity and efficiency in jobs ranging from cleaning cart paths and other maintained paved areas, to blowing grass clippings, aeration cores, chaff or other organic debris off fairways or greens. 4 specialty nozzles are available for use in a variety of applications.

Pro Sweep® ▲

Quickly sweeps up cores so the turf can be cleaned and ready for play in no time. The offset collection position prevents the tow vehicle from running over cores before they reach the sweeper.

Pro Force® Debris Blower ▲

Delivers industry-leading air power through a turbine-type design. An excellent performer on turf or pavement, the self-contained, engine-driven blower can be towed behind or mounted to the bed of any utility vehicle. Design allows the operator to adjust the airflow direction 360 degrees from the tow vehicle seat.

360 Pro Force Debris Blower ▲

This highly manoeuvrable and productive blower's left-to-right sweep allows better direction control of air flow. Attached to the front of the Groundsmaster® 360, it provides improved visibility, versatility and increased seasonality.

Debris Blower 600 ▲

Choose a PTO or self-powered Toro Debris Blower to generate turf-clearing winds of up to 246 km/h.

Rake-O-Vac® ▲

The compact Toro® Rake-O-Vac clears debris from even the tightest areas. Its 3.6 m³ hopper has the capacity for large jobs. A powerful engine sweeps turf clean and helps make the Rake-O-Vac the most manoeuvrable self-powered sweeper in its class. To save space in the hopper, a rugged impeller fan pulverizes debris.

Versa-Vac* ▲

The Toro Versa-Vac tackles debris management challenges to meet your collection needs. The large capacity hopper makes even the biggest clean-up job simple. For operator ease, the deck and trailer operate hydraulically from convenient tractor seat controls.

SPECIFICATIONS

	Pro Sweep	Pro Force Debris Blower	360 Pro Force Debris Blower
Power & Towing Requirements	Vehicle: 30.3 l/min @ 2000 psi; Tractor: 18.6 kW (25 hp)	Engine	18.3 kW (24.6 hp)

CULTIVATION EQUIPMENT

PROCORE 648 · 864 · 1298 · CORE PROCESSOR

AEROTHATCH 83 · SEEDER 93

For greens, fairways, tee boxes and rough, Toro® offers a complete array of aeration and cultivation solutions to keep your course looking its best. The ProCore line of aerators has long been considered the leader for hole quality, durability and productivity. And for exceptional one-pass cultivation, the Toro Aerothatch 83/Seeder 93 is hard to beat.

TRUECORE SENSING SYSTEM

Automatically maintains tine depth “on the move” to match the ground undulations providing consistent coring depth of up to 10 cm.

SPECIFICATIONS

	PROCORE® 648	PROCORE 864	PROCORE 1298

Hitch Systems	OnePass hitch	Seed Delivery	16 tubes & discs

ProCore® 648 ▲

An innovative wheels-forward design eliminates the most common problem with greens aerators: crushed cores and damaged holes.

ProCore 864 ▲

Perfect for any turf area, thanks to a 152 cm width and a rugged triple-belt design. It delivers outstanding versatility and impressive core quality.

ProCore 1298 ▲

Designed for large turf areas, the ProCore 1298 provides exceptional productivity without compromising hole quality. The triple-belt design brings extra durability in tough conditions.

ProCore Core Processor ▲

This innovative product sweeps, processes and disperses aeration cores in one operation, reducing labour and returning the turf to play sooner than any other method.

Aerothatch 83 • Seeder 93 ▲

A unique Toro combination saves time by providing the efficiency of one-pass dethatching and seeding.

PROCORE[®]

PROCORE SR48 · SR54 · SR70 · SR54-S/SR70-S · SR72 · SR75

The ProCore SR Series deep-tine aerators are the ultimate choice for performance and quality. From lightweight, precision machines for sensitive turf to robust, heavy-duty machines that break up soil on even the most compacted surfaces, the ProCore SR Series will get the job done!

◀ Deep-Tine Aeration

Penetrates through the compaction layer that is created from traditional aeration methods. Penetrating this layer increases drainage, improves gas exchange, and promotes deeper root growth resulting in healthier, more vigorous turf.

ProCore® SR48 ▲

Designed for use in medium to heavy soil conditions, including soil with hard clay and other compacted surfaces. Features a working width of 122 cm and depths up to 36 cm.

ProCore SR54 ▲

The compact SR54 is designed for use on greens, tees and other turf areas with light to medium soil conditions. With a working width of 137 cm and depth capabilities up to 25 cm, it is ideal for smaller tractors.

ProCore SR70 ▲

For use on greens, tees, and other turf areas with light to medium soil, with a working width of 185 cm and depth capabilities of 25 cm. Similar design to the SR54, but adds 25% more productivity to its working width.

ProCore SR54-S/SR70-S ▲

Same width and depth capabilities as the SR54/SR70, with a dual roller design. Two rollers distribute the machine weight evenly for superior ground following on undulating surfaces.

ProCore SR72 ▲

Versatile to handle light or heavy duty aeration tasks, the SR72 is the most durable and ideal for aerating fairways, sports fields, greens, tees and other formal turf areas. Similar in design to the SR48, but with a working width of 183 cm, and capable of depths up to 41 cm.

ProCore SR75 ▲

The most rugged of the ProCore SR series aerators, the SR75 is designed to handle the toughest aeration tasks. Featuring a working width of 198 cm and capable of depths up to 41 cm.

SPECIFICATIONS

	PROCORE SR48	PROCORE SR54/SR54-S	PROCORE SR70/SR70-S	PROCORE SR72	PROCORE SR75

WORKMAN®

WORKMAN GTX

Featuring an unequaled combination of comfort, utility and control, the new Workman GTX is simply superior to the competition. Its power, steering and exclusive suspension and braking systems make the Workman GTX the most versatile, practical, and comfortable utility vehicle in its class. Available in petrol or electric, The Workman GTX features over 300 configuration options; including front and rear attachments, a flat bed and a four-seat option. So whether you are setting cups, checking on irrigation, working around campus, or moving people or materials, the Workman GTX has the power and versatility to get the job done, better!

SUPERIOR SUSPENSION

Coil-over shocks on all four tyres deliver greater suspension travel and adjust-ability resulting in a smoother ride and minimized operator fatigue. We also made it the only vehicle in its class to feature a split frame to further increase ride comfort.

WATCH THE VIDEO
Toro.com/GTX

SUPERIOR VERSATILITY

The Workman® GTX is adaptable for any task. Two or four-seat configurations come with bench or bucket seats. Front and rear attachment points for garbage cans, hose reels or walk spreaders free up the bed for more hauling capacity. 1.2 m and 1.8 m flat beds are also available. With over 300 unique configurations available, you are sure to find the one that fits your needs.

SUPERIOR DETAILING ▼

With hydraulic disc brakes to minimize maintenance and provide consistent, safe stopping. Full access to the engine compartment makes servicing easy. Storage is abundant and two standard USB ports make a dead phone on the job a thing of the past.

SPECIFICATIONS

WORKMAN®

WORKMAN MDX SERIES · HD SERIES

A good utility vehicle acts like an extension of your crew. Every day demands reliability, versatility and rugged performance – and the Toro® Workman delivers. Choose an agile mid-duty model or a heavy-duty model for your toughest tasks. A large cargo capacity and countless attachments will make a Toro vehicle one of the most valuable members of your team.

SUPERIOR RIDE QUALITY

SRQ – Represents the Superior Ride Quality you can expect every time you drive a Workman MD Series utility vehicle. The SRQ system starts with coil-over shock absorbers that cushion bumps in the terrain. Working together with an Active In-Frame twister joint that allows each axle to follow ground contours independently, operators will notice a smoother ride and all-day comfort. The Active In-Frame twister joint ensure all four wheels maintain contact with the ground for better control and traction over rough terrain.

UNMATCHED TOUGHNESS

The Workman HD series gets its remarkable strength from a rear DeDion axle built with an I-beam design. It gives the Workman superior vertical loading capacity by isolating the engine, transmission and mainframe from all load forces. The Workman HD is engineered with a truss-like front space frame for superior strength and rigidity, and a rear frame with a C-channel design for unsurpassed performance in hauling heavy loads.

MULTI PRO®

MULTI PRO 1750 · WM · 5800-D

Toro® is the leading provider of dedicated turf spraying equipment, offering a complete line for any need or budget. Each Multi Pro incorporates the latest in sprayer technology with tanks ranging from 600 to 1100 litres. Attachments such as the Cleanload Eductor and Fresh Water Rinse Kit make these sprayers even easier to use and easier to maintain which saves effort and reduces costs.

Multi Pro 1750 ▲

Uses Toro's advanced spray system design from the proven Multi Pro 5800-D in a smaller package. Combined with cutting-edge sprayer controls and productive vehicle features, the result is one of the most advanced, efficient and accurate sprayers on the market.

Multi Pro WM ▲

Leverages the advanced spray system capability of Toro's Multi Pro 5800-D and combines this spray system functionality with cutting-edge and intuitive sprayer controls to create the most advanced and efficient and accurate bed-mounted sprayer accessory for a utility vehicle. Fits with the Workman® HD or HDX utility vehicles.

Multi Pro 5800-D ▲

Combines advanced sprayer technology and innovation with optimised performance accuracy, aggressive agitation and faster response times to consistently and accurately apply desired spray rates. Highly productive work attachments and accessories save time and money by simplifying the mixing and spraying processes, and saving on labour and chemical costs.

[Toro.com/GOLF](https://www.toro.com/GOLF)

NEW!

ExcelaRate™ Rate Control System (for Multi Pro 5800-D)

Achieving precise application rates is simple and repeatable. Step-by-step calibration and memory of your two most commonly used rates saves time and increases accuracy.

1

Elliptical Chemical Tank

Thoughtfully designed tanks incorporate side-mounted agitation nozzles to ensure the homogeneous mixing of chemicals for application accuracy and consistency.

2

Ultra Sonic Boom Kit

Automatically maintains optimal boom height in undulating turf conditions with sensors and a dedicated controller.

3

Six Diaphragm Pump

A turf industry exclusive – this oversized pump satisfies the highest spray rates while simultaneously supplying generous agitation flow. Features a dry sump and self-priming design.

QuickFind®

Places command of all key vehicle and sprayer systems at the operator's fingertips for ease-of-use and improved control.

Fresh Water Rinse Kit

Simplifies and automates the triple-rinse process, saving hours of clean-up time.

Cleanload Eductor

An on-board mixing station for safely loading any product without the need to first mix a slurry.

GeoLink® Precision Spray System

The industry's first turf-based precision spray system. Turf professionals will benefit from substantial chemical savings thanks to individual nozzle control and unsurpassed accuracy only from Toro. *Limited Availability.*

Accessories Available:

Covered Boom Shroud, Enclosed Cab, Sunshade Canopy, Electric Hose Reel, Pro Foam Marking Kit and a wide variety of nozzles.

TOPDRESSER · PROPASS · MH-400

TOPDRESSER 1800 · TOPDRESSER 2500 · PROPASS 200 · MH-400

From light topdressing to ultra-heavy material handling and everything in between, all jobs can be tackled by the Toro® line up of application and topdressing equipment.

WIRELESS REMOTE OPERATION

Allows real-time adjustments on the ProPass 200 and the MH-400 allowing you to make quick setting changes and store settings for future use. Base models feature a wired controller.

Topdresser 1800 ▲

Mounts to a Toro Workman® and delivers a precise, productive performance with up to 13 km/h topdressing speed. A remote on-off application lever allows precise control/placement from the operator's compartment.

Topdresser 2500 ▲

For maximum performance and power, the Topdresser 2500 has a 700 litre hopper capacity and 13 km/h topdressing speed for the toughest jobs. The all-wheel drive ensures a consistent application rate on uneven terrain.

ProPass 200 ▲

Broadcast-style topdressers provide application versatility, from ultra-light dustings to ultra-heavy aeration hole filling. The ProPass 200 delivers accurate spread patterns on the first pass. Tow behind or bed mounted versions available.

MH-400 ▲

Large capacity and performance provide versatility. The cross conveyor is ideal for completing bunker and greens renovations, cart path rebuilding, applying mulch, and more. Install the twin spinner for large area topdressing.
