myTurf® Wireless System

AUTOMATED MAINTENANCE ALERTS

Advantages of myTurf Wireless

- Save time – no need to gather hours from machines
- Make sure PM gets done – automatic hours and alerts (myTurf)
- WHM automatically conveys correct machine hours – no more labels on machine when a meter has been replaced
- Works on Toro and non-Toro equipment
- Shop efficiency improvement (lean initiative)

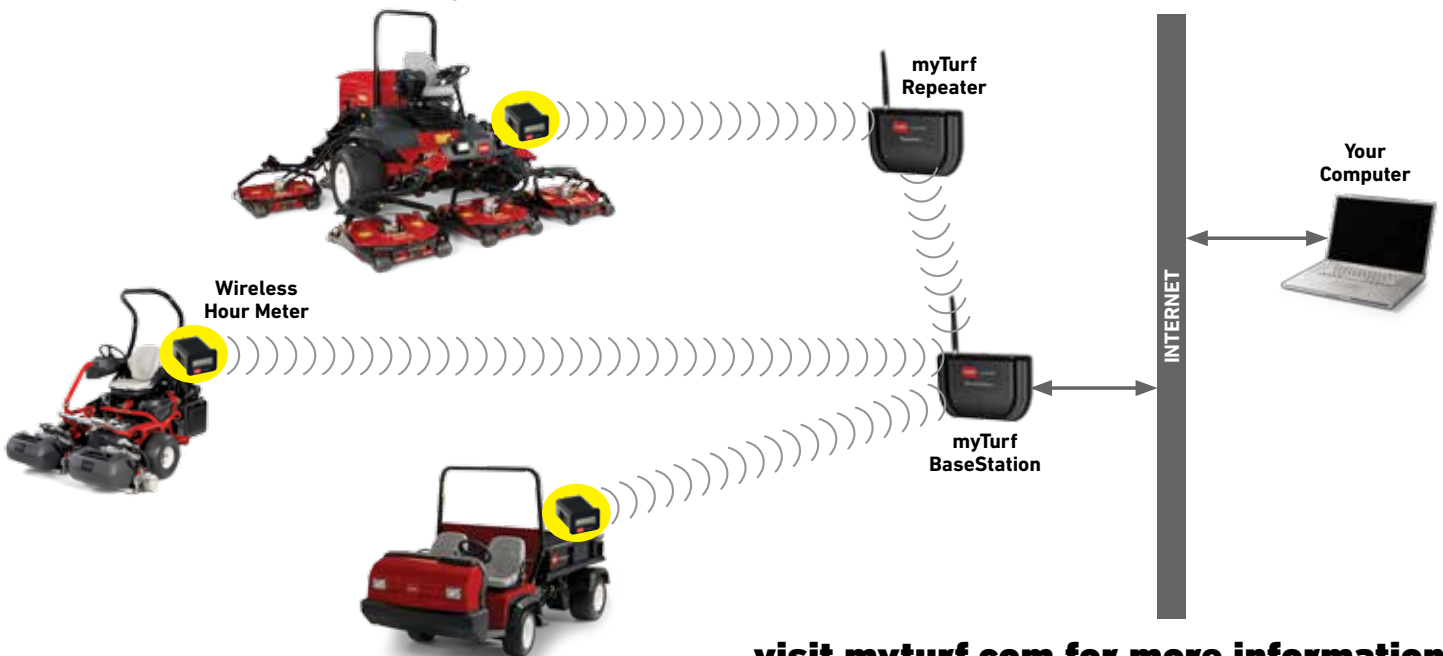

What is needed before ordering a myTurf Wireless System

- Any myTurf subscription – it's best to subscribe and get set up ahead of time. Enroll now at myturf.com
- If already a myTurf subscriber, enable your myTurf account for wireless by contacting the myTurf Support team at Toro® NSN® (required for system configuration)
- Open, live Ethernet Jack with Internet access – it's best to test it ahead of time. A hub can provide more open ports.
- A copy of the "Toro myTurf BaseStation Internet Connection Overview" sheet to clear the system with your IT department (firewalls, etc). This document is available right in your myTurf account – in the myTurf Wireless Page
- Idea of site layout and best place for BaseStation (to see if Repeater will be needed). Watch the demo clip on myturf.com and your myTurf Wireless Page

myTurf Wireless System Specifications

- myTurf BaseStation receives Wireless Hour Meter signals with a range of up to 250 feet "line of sight"
- Radio devices operate at 2.4GHz frequency, IEEE 802.15.4. The system has been thoroughly tested and complies with all regulatory requirements to prevent interference with WiFi (802.11) networks
- myTurf BaseStation is an RF to Ethernet Gateway used to communicate hours to myTurf. BaseStation does not circumvent local firewall and network policies
- Wireless Hour Meters report on power up, and periodically when in range – minimum goal is to report once daily
- One BaseStation is needed per site and can support up to 8 Repeaters. Base stations and repeaters should be installed indoors (not suited for outdoors)
- An outdoor antenna is available for rare, difficult reception situations
- Operates on battery-equipped machines
- Warranty is 2 years – please see Warranty Statement for complete details
