Twilight™ Golf Cup & Perimeter Lighting

Enhance Events

Quick-Connect
Perimeter Lighting

Increase Club Revenue

The Toro® Twilight™ Golf Cup and perimeter lighting promote nighttime putting and evening special events. Experience increased clubhouse revenues quickly and easily as guests remain longer and enjoy other amenities your facility has to offer like dining, lounges and the Pro Shop.

- Create ambiance
- Extend clubhouse hours and increase food & beverage sales
- Enhance evening special events including weddings, anniversaries, holiday celebrations
- Entice new members

The wireless Toro® Twilight™ Golf Cup is sized to fit into any standard cup hole. Convenient battery operation and wireless technology makes it quick to install. An energy efficient LED light source creates a focused beam of light to brightly illuminate the flag and cup. Their Lithium-Ion battery will provide illumination for a full eight hours and requires about five hours charge time to achieve full capacity. The charger will charge up to three cups at a time.

The quick-connect system for perimeter lighting is a snap. The perimeter lights plug in for use during evening activities and are removable during daytime hours.

“The lighting will have already paid for itself by mid-year due to incremental food and beverage revenue”

*~ Mark Gore
General Manager, Firestone Country Club*
