*Battery manufacturer rating = 60V maximum & 54V typical usage. Actual voltage varies with load. *Compared to leading 60V battery-powered outdoor power equipment brands. Maximum battery power output measured in watts, based on battery cell manufacturer's rating. Actual power output dependent on tool used and use conditions. *Run time varies based on usage conditions. Max run time space based on light conditions and/or lowest speed settings. *Space savings are in relation to the space consumed by a Toro 22" walk power mower stored with the handle in the standard operating position. *The gross torque of this engine was laboratory rated at 2600 RPM per SAE J1940 by the engine manufacturer. As configured to meet safety, emission and operating requirements, the actual engine torque on these mowers may be significantly lower. *Side discharge chute optional and sold separately. *See dealer for complete warranty details and for Guaranteed to Start Warranty (GTS) warranty details and limitations.
