NOZZLES

Step 1: CHOOSE YOUR NOZZLE

SYSTEMIC NOZZLES (OPEN BOOM)

	Excellent	Very Good	Good
Herbicides			
Soil Incorporated	•		
Pre-Emergence	•		
Post-Emergence		•	
Fungicides		•	
Insecticides		•

Drift	•		

Systemic nozzles provide excellent spray distribution through a wide angle, flat spray pattern. These nozzles are excellent at reducing spray drift.

AIC TEEJET® (AIR INDUCTION FLAT FAN)

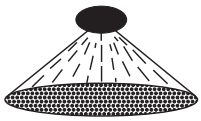
The AIC TeeJet® (Air Induction Flat Fan) nozzle is a good general purpose nozzle that can be used for both contact and systemic applications. The spray pattern is 110 degrees with tapered edges similar to a standard flat fan. This nozzle produces coarse air-filled droplets with a venturi air aspirator. The air-filled drops reduce spray drift but provide good contact coverage. Air Induction nozzles can be operated at higher spray pressures without creating excessive spray drift. Distribution AIC nozzles are best when used at pressures above 30 psi.

TURFJET WIDE ANGLE FLAT SPRAY

The TurfJet is a wide 130 degree angle nozzle with a tapered fan pattern. The TurfJet is best suited for systemic applications where distribution quality is the primary goal. The TurfJet creates extra coarse droplets and provides good drift control. Distribution quality is excellent at all pressures.

CONTACT NOZZLES (ANY BOOM)

	Excellent	Very Good	Good
Herbicides			
Soil Incorporated			
Pre-Emergence			
Post-Emergence	• contact/high-pressure		• systemic/low-pressure
Fungicides	• contact/high-pressure		• systemic/low-pressure
Insecticides	• contact/high-pressure		• systemic/low-pressure
Liquid Fertilizer		• systemic/low-pressure	• contact/high-pressure
Drift			• contact/high-pressure



Contact nozzles provide excellent spray distribution over a wide range of pressures. These nozzles allow for better coverage at higher pressures.

Toro exclusive AI Turbo Twin Jet in the 0.8, 1.0 and 1.5 sizes.

AIR INDUCTION TURBO TWINJET®

The Air Induction Turbo TwinJet® is an air induction style nozzle with two separate 110 degree spray patterns. One spray pattern is directed forward of vertical and the second pattern is directed rear of vertical. This nozzle creates medium and coarse droplets and is an excellent nozzle for contact applications where drift control is needed. The two independent spray patterns improve contact coverage by spraying the turf at two different angles.

XRC TEEJET® FLAT FAN

The Standard XRC Flat Fan nozzle has a 110 degree tapered spray pattern and produces medium and fine droplets. Because of the smaller droplets the Standard XRC Flat Fan is best suited for contact applications where drift control is not needed.

	Contact Products	Systemic Products	Drift Control
AIC	Good	Excellent	Excellent
AI Turbo Twinjet	Excellent	Good	Good
Turfjet	Poor	Excellent	Excellent
XRC	Excellent	Good	Poor
