

Operator safety is our concern

The Toro Company is pleased to continue an educational initiative for landscape maintenance equipment operators of ZRT or "Z" mowers that reinforces safe operation of these products. Customer safety has always been a priority for The Toro Company.

We have introduced a *Driving in the Safety Zone* video to educate mower operators about hazards to avoid while mowing.

If you would like a *free* copy of this video:

- Call toll free 1-800-348-2424 x4676
- Visit www.toro.com/safety for the video and more information plus safety tips on Z Master® mowers.

Video provided in both Spanish and English

Driving in the Safety Zone means making choices that keep you out of high-risk situations and hazards, like steep slopes or sudden drop-offs near water. Stay off hills or surfaces with a slope greater than 15 degrees.

Are you in the Driving Safety Zone?

2-Post Foldable Roll-Over-Protection System Now Standard On All 2004 Z Master Riders

Available as an accessory for all prior year Z Masters

Folding ROPS - enhances operator safety and provides clearance when loading on enclosed trailers. Seat belt and seat latch are included with ROPS System.

OSHA
Certified

*ROPS is standard on all 2004 Z Master Z500 and Z100 series mowers.

Special Offer

As part of our ongoing new product development, Toro will be equipping all new 2004 Z Master commercial mowers with a 2-post *foldable* Roll-Over-Protection System (ROPS) as standard equipment.

With operator safety in mind, we are making 2-post foldable ROPS retrofit kits available for all previously produced Z Master mid-mount units at no charge (transportation fees may apply). We strongly recommend that you update your older units, particularly if you mow near slopes, water or drop-offs.

Please see your Toro landscape contractor equipment dealer for details or call us at 1-888-865-5675 (U.S. and Canada).
