IRRITROL® LXC

COMING FALL OF 2022

The LXC features modular station expansion up to 52 conventional stations to adapt to changing landscapes. It can also be configured to handle up to 100 two-wire stations. LXC Series controllers include flow monitoring for maximum water management efficiency and ET adjustment when equipped with a wireless weather sensor. Plus, they're cloud-ready — so as irrigation management evolves, they can too.

- Multi-station operation
- Weather-based ET adjustment and SMRTSCAPE™ compatible
- Best for larger-scale, high-end residential or light commercial applications

IRRITROL® EAGLE™ PLUS

Eagle Plus is Irritrol's premier controller for large commercial properties, combining classic controller programming with cutting-edge features — including an optional weather station. It's compatible with the iCentral™ web-based water management system, and it works with an array of flow management and other sensors to enable quick action before significant vegetation or water damage occurs.

- Accommodates large systems (up to 48 stations in conventional configuration or up to 200 stations in two-wire configuration)
- Compatible with the optional ProMax™ Remote Control System to manage or troubleshoot from a line of sight of up to one mile away
- Ideal for ground maintenance personnel and landscape managers who require a fully automated “smart” ET weather-based irrigation controller

A photograph of a sports stadium during a maintenance operation. The foreground is a lush green field. In the middle ground, several large water cannons are spraying water onto the field. The stadium seating is visible in the background, with rows of red and blue seats. The stadium roof is a large, modern structure with a white facade and dark beams. The sky is overcast.

SPORTS FIELDS AND GROUNDS

TORO® DXi™

DXi works with either Laguna™ or WMS precision irrigation management software to provide a wide range of functionality — from basic irrigation scheduling to ET, flow sharing and flow management. It also includes convenient mobile access with the free ProMax™ Connect app. Users can choose from multiple communications options, including 10 years of cellular service with no initial subscription.

- Built to order from a variety of configurations to meet specific needs
- Choose from multiple enclosure options and irrigation methods (conventional, two-wire or hybrid)
- Perfect for supersites like sports fields, educational settings and public greenspaces
- Cloud-based control with the ProMax Connect app
- Compatible with Turf Guard®/two-wire soil sensor
