

GET TWICE THE PRODUCTIVITY of a 21" walk-behind aerator with the new 24" stand-on model. Built for the demands of busy landscape contractors, it packs the power of a larger model in a smaller footprint so you can maneuver with ease. Now you can reach areas that could previously only be accessed by a walk-behind unit, saving time on projects both large and small.

MANEUVER IN TIGHT SPACES with a compact design that fits through a standard 36" gate.

NAVIGATE WITH EASE with intuitive controls that function a lot like a mower, saving time.

MAKE QUICK WORK OF BIG JOBS with ground speeds of up to 6.8 mph.

TURF RENOVATION

ALL NEW 24" STAND-ON AERATOR

SAVES LAWNS AND TIME.

**1.5 Acres
COVERED
PER HOUR**

CONSISTENT POWER

Electronic depth control optimizes power and hydraulics, ensuring consistent core depths on any terrain. Hydraforce valve adjusts operator weight.

INTUITIVE CONTROLS

All necessary functions are at the operator's fingertips, including depth control with supervisor maximum-depth lockout, maintenance reminders and tine activation lockout.

CONVENIENT SERVICE

Engine and other common service components are easy to access for quick maintenance.
