

To keep pace with new features and enhancements being made to the EVOLUTION® controller, the EVOLUTION® Smart Connect owner must upgrade the firmware for his or her Smart Connect device. Enhancements include:

- **SMRT Logic™:** Enables communication with SMRT Logic internet gateway.
- **Updates:** Enables over-the-air firmware updates of EVOLUTION and Smart Connect.

Quick Directions:

1. Download the latest firmware update files from www.toro.com/evolution.
2. Copy and paste the files from the downloaded folder onto a formatted SD card.
3. Insert the card into the Smart Connect's SD card slot. The upgrade will begin automatically.

For a *step-by-step walkthrough*, please read on.

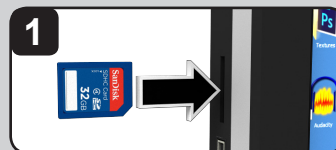

At the Computer

A Prepare the SD card

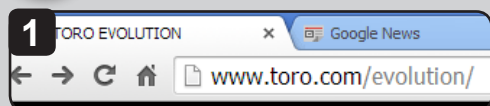

Recommended:

- formatted FAT
- 2 GB max

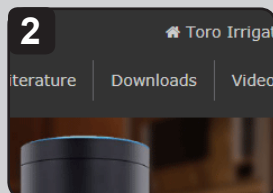

Insert SD card into computer SD card slot.
The SD card supplied with the EVO-WS can be used.

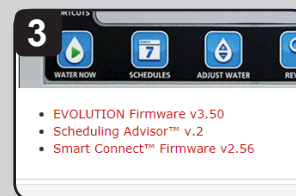

B Download the firmware files

Browse to Toro's EVOLUTION page:
USA & Canada: www.toro.com/en/evolution
Int'l: www.toroevolution.com

Click on the Downloads link.
(US website shown.)

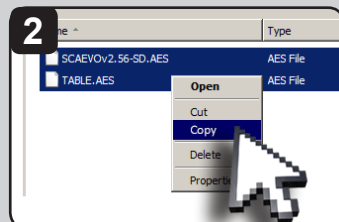

Click the "Smart Connect®
Firmware v2.56" link.
Save the file to your computer's desktop.

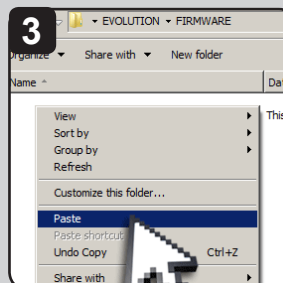

C Copy the files to the SD card

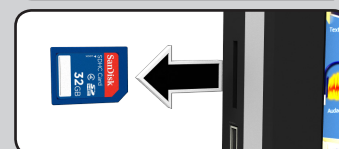

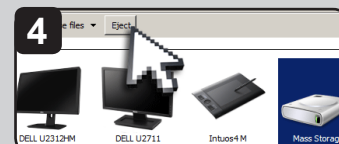

Navigate to downloaded folder
titled "EVO-SC_Update_256"
and open folder.

You will see two files.
Sweep and COPY those files.

PASTE the files onto
the SD card *at the root level*.

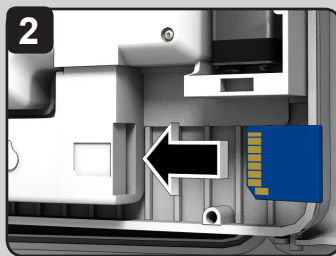

EJECT and remove the SD
card.

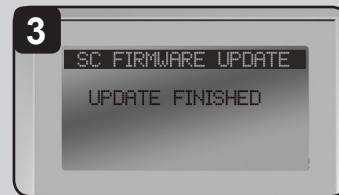

At the Controller

1
The controller must be powered on.
Open the EVOLUTION controller's
front panel.

2
Insert SD card into the
Smart Connect's SD card slot.

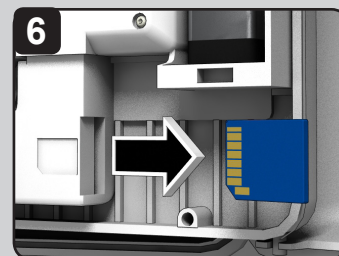

3
The firmware update will begin
and end automatically.

4
Controller does a soft reboot and is updated.

5
Go to
ADVANCED-->FIRMWARE-->VERSION
to confirm Smart Connect firmware is
updated to 2.56.

6
Remove SD card.
See note below.

IMPORTANT NOTE ABOUT THE SD CARD:

After upgrading the EVOLUTION controller and Smart Connect, ***the firmware files must be removed from the SD card.*** If they are left on it, the controller will automatically initiate the upgrade procedure whenever the SD card is inserted into the Smart Connect.

Count on it.
