

Resource Library Overview

Resource Library is available on Toro Connect to all users. It contains various content items, such as bulletins, forms, reports, websites, and videos. Only content that pertains to the user signed in will be available.

Finding content in the Resource Library is achieved by Search, Navigation, and/or Filter features. There is also a Favorites feature you might find helpful for content items you frequently visit.

Search for content by entering one or more search terms in the search bar.

Search terms are collected as they are entered. The collection of terms are used in your search until removed. Click the "x" positioned at the left of the term to remove it.

In the following example the term "bulletin" was used, and it returned a total of 70 content items. If you were to enter a second search term without deleting the first, Resource Library will include "bulletin" in your search. This is good to keep in mind.

Count on it.

	<input type="checkbox"/>

Filters will reduce the document count by the selections you make. This is especially useful if you sell multiple Toro lines. Filters are available for Product Lines and Language.

Navigation tiles allow you to find content based on subjects displayed. Navigation and search work together. This is good to remember when looking for content.

The results page shows a count of how many items were found. The page displays 10 by default but you can change it to display 25 at a time or All. Browsing by page is also available by clicking the forward or back arrows.

Results are returned sorted by most recent. This is the default. You can select to sort the results by clicking the red carrot alongside the columns.

File Type Favorite Title Category Effective Date

Content is viewable two ways: Clicking from the file type column will open the content directly. Clicking the title will open the Content Information page. **Note:** When the file type icon is blank it means there are more than one file available. Clicking a blank file type will take you to the Content Information page.
