

# Choosing the Right Outdoor Lighting

*Features of a quality fixture*

UNIQUE  
LIGHTING SYSTEMS®

From plant placement to layout, there are so many aspects to think about when planning an outdoor space. So, when it comes to outdoor lighting, do the fixtures make a difference in the end result? The short answer is, "Yes!"

Whether creating an extravagant design to level up a home's facade or making a simple upgrade to spruce up an outdoor area, taking time to review lighting options will allow you to choose the right fixtures for your design. Here are a few aspects to think about during the process:

## The Materials

Outdoor lights need to withstand the harsh elements of Mother Nature: from sun exposure to high moisture conditions to freezing cold temperatures and harsh winter snow. Unique Lighting Systems® sets itself apart with premium cast brass fixtures, with many equipped and ready with a wire lead for the HUB system. Elements Series Fixtures also come equipped with a *FLEX™* Auxiliary Wire Lead along with anti-moisture migration connections to protect the lighting wiring as much as possible.

These materials paired with a professional grade manufacturing process gives Unique Lighting™ fixtures a high level of performance and durability. Plus, the beautiful styling of each fixture gives them a high-end look. It means these lights will do their job and look good while making the beauty of any home fully shine.

For example, Inspira® Fixtures are ideal for one-of-a-kind custom lighting design and a variety of lighting portrait options. The premium grade solid brass and composite material make each fixture durable, and the cloud connection through SMRTscape™ allows color customization, beam angle control and output brightness controlled from anywhere, anytime.

With many product patents, Unique Lighting Systems exclusive fixture designs offer a truly custom look both in lighting design and fixture elegance.

## The Warranties

Let's face it. Products break from time to time – whether from an accident, weather wear or otherwise. Looking at what kind of warranty a light fixture has is important to know how it can be replaced if the need should arise in the future.

Unique Lighting Systems stands behind its products and stays true to each fixture's warranty, many of which are industry leading. Most if not all products have a 5-year warranty all the way up to a limited lifetime warranty. Knowing this information gives homeowners the peace of mind they need when choosing their outdoor lighting fixtures.

## The Service

When choosing light fixtures, it is also helpful to look at the customer service and professional installing options that come with a company. It can save many

headaches of creating a beautiful outdoor space.

The great news? Fixtures from Unique Lighting Systems are backed by excellent customer service along with over 1,000 distributors worldwide that stock Unique Lighting Systems products and provide local product support. Plus, if you don't know where to start, contact your local low voltage outdoor lighting professional or landscape contractor.

Choose outdoor lighting fixtures with confidence using these tips! Contact Unique Lighting Systems today to find out more about their unique and high-quality fixtures to use in your outdoor setting.
