

HUBS • Equalizer HUB • Satellite HUB • Galaxy HUB • Intelli-HUB

- Central location for connections
- Fused at point of connection
- Protects connections from moisture
- Reduces number of connections
- Flexibility in fixture location and future system expansion
- Distributes proper voltage evenly to each fixture

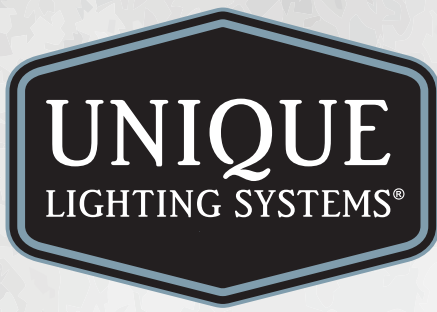

Equalizer HUB

Galaxy HUB

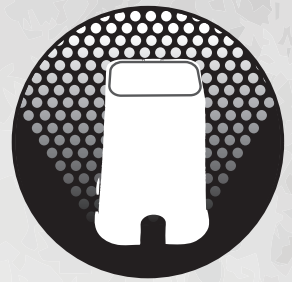

Intelli-HUB

HUBs

Connection Protection

The HUB Wiring Method is the ultimate in-line fuse protected wiring system and the future of landscape lighting wiring. Unique Lighting Systems® includes a replaceable 20 and 10 amp fuse at the point of connection allowing you to size the fuse according to load or wire size, thus making troubleshooting accessible, convenient and fast.

HUB Housing

FEATURES & BENEFITS

- Brown ABS housing easily hides in the landscape
- Impact resistant so it holds up to the abuse of landscaping
- Snap-in lid makes access for expansion or maintenance easy
- Compact size is perfect for planters

Intelli-HUB
Part # INTELLIHUB

Dimensions
Height: 8.52" (216.408 mm)
Diameter: 6.03" (153.162 mm)

Galaxy HUB
Part # GALAXYHUB

Dimensions
Height: 8.52" (216.408 mm)
Diameter: 6.03" (153.162 mm)

Satellite HUB
Part # SHUB

Dimensions
Height: 8.125" (206.375 mm)
Diameter: 5.75" (146.05 mm)

Equalizer HUB
Part # FHUB

Dimensions
Height: 9.1" (231.14 mm)
Diameter: 2.67" (67.818 mm)

Fuse Link

FEATURES & BENEFITS

- 20 Amp rated gives you the ability to fuse to the load
- Water resistant design protects in damp locations
- 8" 10AWG wire leads
- Protects wire from damage that may occur in the yard

Direct Burial Connections

FEATURES & BENEFITS

- Solid brass barrel lugs for lasting durable connections
- Pre-greased black wire caps to protect connections from moisture
- Solid mechanical connections ensures the life and performance of the HUB
