

20" HYDRAULIC SLIT SEEDER

The 20" hydraulic slit seeder is the perfect tool for landscape contractors or homeowners with user-friendly controls, durable construction, and maneuverability to make overseeding an easy task. Durable, lightweight and easy to use, Toro slit seeders handle like a self-propelled push mower. Operators can make a tight turn — even on hills — with one hand. And the variable-speed drive system operates in forward and reverse. For maximum durability, they're constructed of solid 11-gauge steel with high-carbon, heat-treated spring steel blades.

KEY FEATURES

- Solid, high-carbon, heat-treated spring steel blades can handle abuse without chipping or bending and effectively verticut into the top thatch layer to improve turf health and ensure seed-to-soil contact.
- Larger seed hoppers and seed flow that can be adjusted on the fly ensure productivity and ease-of-use in any application.
- Durable cutting blades are made of high-carbon, heat-treated spring steel that can handle abuse without chipping or bending.

KEY SPECIFICATIONS

20" HYDRAULIC SLIT SEEDER (model 23508)	
Engine	Subaru® EX27
Fuel Capacity	1.6 gallons
Working Width	20"
Depth	Up to 1"
Width	30"
Height	28" (handle folded) 45" (handle working)
Length	27" (handle folded) 52" (handle working)
Weight	260 lbs.
Ground Speed	3 mph fwd / 2.2 mph rev
Seed Hopper Capacity	40 lbs.
Blades	10 verticutting blades
